THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code:

F003

Waste Description:

THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code:

F004

Waste Description:

THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: CRESOLS, CRESYLIC ACID, AND NITROBENZENE; AND THE STILL BOTTOMS FROM THE RECOVERY OF THESE SOLVENTS; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code:

F005

Waste Description:

THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code:

F006

Waste Description:

WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## **STANDARD ENVIRONMENTAL RECORDS**

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

## ***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

## VCP: Voluntary Cleanup, Oversight and Assistance Program Sites

The Voluntary Cleanup Oversight and Assistance Program (VOAP) offers people the opportunity to work proactively with state government to address necessary cleanup of a property to return it to productive use. In return for their efforts, participants can receive a No Further Action letter and a release of liability for areas where investigation and cleanup is conducted. The program is open to everyone with an interest in addressing contamination at a site.

### **Local Brownfield lists**

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## EDR HIGH RISK HISTORICAL RECORDS

### *EDR Exclusive Records*

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

#### CT MANIFEST: Hazardous Waste Manifest Data

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## **AQUIFLOW®**

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: COLLEGEDALE

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained. Soils have intermediate water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: HIGH

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# Tier 1 Vapor Encroachment Screening Report

## ◆ Introduction

S&ME has conducted a Phase I Environmental Site Assessment (ESA) for the proposed Oak Ridge Airport northeast of Oak Ridge Turnpike in Oak Ridge, Tennessee. The Phase I ESA was performed in accordance with American Society for Testing and Materials (ASTM) E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM 2013), which requires the consideration of confirmed or potential releases of hazardous substances and/or petroleum products that may pose a threat of contamination to the subject property, including an evaluation of the potential migration of vapors. The evaluation of potential migration of contaminant vapors for this Phase I ESA, herein referred to as a Tier 1 Vapor Encroachment Screening (VES), was accomplished utilizing procedures described as Tier 1 Screening in ASTM E2600-15, *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions* (ASTM 2015) and, if applicable, using the refined search distances presented by Buonicore (2009), as described below.

## ◆ Purpose

The purpose of this VES is to assist in evaluating the existence of Vapor Encroachment Conditions (VECs) at the subject property. The VES was performed to identify releases or potential releases of chemicals of concern on or near the subject property and to evaluate the likelihood of vapors migrating from the releases via the subsurface to the subject property. The presence or likely presence of vapors containing chemicals of concern in the subsurface of the subject property constitutes a VEC and may also constitute a *recognized environmental condition* (REC), as defined by ASTM E1527-13.

## ◆ Evaluation Process

The following information was reviewed during the Tier 1 VES to identify releases or potential releases of chemicals of concern on or near the subject property and to evaluate the likelihood of vapors migrating from the releases via the subsurface to the subject property:

- The type of contaminant (petroleum product vs. non-petroleum product known or suspected to have been stored on-site or at identified off-site sources;
- The distance between identified off-site sources and the nearest subject property boundary;
- Information of known or assumed groundwater flow directions(s) with respect to the subject property;
- The potential for preferential pathways or barriers to exist between the identified off-site sources and the subject property boundary; and,
- Physical setting and other information sources.

The ASTM E 2600-15 Tier 1 Screening process recommends initial screening distances to estimate contaminant plume length and width with no empirical plume data. In cases where the direction of groundwater flow is known or can be reasonably assumed, those distances were refined under a conservative scenario using calculations presented by Buonicore (2009). The resulting vapor screening distances (*i.e.*, distances from a potential off-site contaminant source to the nearest boundary of the subject property) are presented in Table 1 with respect to the type of contaminant and the known or presumed direction of groundwater flow.

**Table 1 - VES Area of Concern (AOC) Screening Distances**

Contaminant Type	Source Location with respect to the nearest Subject Property boundary and considering known or assumed groundwater flow direction <sup>(3)</sup>		
	Up-gradient	Cross-gradient	Down-gradient
Non-petroleum COC <sup>(1)</sup> (see ASTM E 2600-15, Appendix X6)	1,760 feet (1/3 <sup>rd</sup> mile)	365 feet	100 feet
Petroleum COC NAPL <sup>(2)</sup>	528 feet (1/10 <sup>th</sup> mile)	165 feet	100 feet
Petroleum COC Dissolved	528 feet (1/10 <sup>th</sup> mile)	95 feet	30 feet

Notes: (1) COC – Chemicals of Concern  
 (2) NAPL – Non Aqueous Phase Liquid (*i.e.*, free product)  
 (3) Groundwater Flow Direction – if not known or assumed, use search distance of 1,760 feet for up-gradient, cross-gradient, and down-gradient

## ◆ Results

USDOE records document the presence of contaminated groundwater and soil on the subject property, in and around the former K-1200 Centrifuge Demonstration Complex. Based upon the presence of contaminants on the subject property, the subject property was identified as a potential vapor contaminant source. Potential off-site contaminant sources were evaluated with respect to the process, screening distances, type of contaminant, and known or assumed groundwater flow direction. No off-site facilities were identified within the AOC relative to the subject property.

## ◆ Conclusion

Based on the processes described herein, the following conclusions were drawn from this VES:

A VEC exists on the subject property.

No offsite facilities were identified within the AOC screening distances considering assumed groundwater flow direction.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

### RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

## **Appendix V – Agreement for Services**

## SUBCONSULTANT AGREEMENT

This is an agreement effective as of March 29, 2021 between **S&ME** ("SUBCONSULTANT") and **Goodwyn, Mills, Cawood (GMC)** ("ENGINEER"). The ENGINEER has entered into a Professional Services Agreement with the City of Oak Ridge to perform various professional services in connection with the new airport. The project for this agreement is described as follows:

Project Summary: *Environmental Assessment – New Airport*

Project Location: *Oak Ridge, TN*

### SCOPE OF SERVICES

The SUBCONSULTANT is to provide various environmental consulting services in connection with the completion of the Oak Ridge Airport Environmental Assessment. The agreed upon work scope is as outlined in the attached proposal dated September 8, 2020 (copy attached).

### TERMS AND CONDITIONS

Terms and conditions are a part of this Agreement and are as outlined in Attachment "A".

### COMPENSATION

The SUBCONSULTANT shall be compensated for performance of work as detailed in Attachment "B".

Agreed as to Scope of Services, Terms and Conditions, and Compensation:

<b>S&amp;ME:</b>	<b>Goodwyn, Mills, Cawood (GMC)</b>
Name: <u>Elizabeth M. Porter</u>	Name: <u>Mant Pasch</u>
Title: <u>Vice President</u>	Title: <u>Aviation Manager-Planning</u>
Date: <u>3/29/2021</u>	Date: <u>3/29/2021</u>

## ATTACHMENT "A" TERMS AND CONDITIONS

**INVOICE PROCEDURE:** The SUBCONSULTANT shall submit monthly invoices to ENGINEER requesting payment for work accomplished during each calendar month. The SUBCONSULTANT specifically understands and agrees that any payment to the SUBCONSULTANT is dependent on the condition precedent that ENGINEER must first receive payment from the Client.

**INSURANCE:** The SUBCONSULTANT shall procure and maintain during the life of this agreement the following insurance coverages with minimum limits as indicated below.

Workers' Compensation:	Statutory
Comprehensive General Liability:	combined single limit of \$1,000,000 per occurrence for bodily injury and property damage
Automobile Liability:	combined single limit of \$1,000,000 per occurrence for bodily injury and property damage
Professional Liability:	\$1,000,000 per claim

### **INDEMNITY**

Both parties agree to indemnify and hold the other harmless, and their respective officers, employees, agents and representatives, from and against liability from all claims, losses, damages and expenses, including reasonable attorneys' fees, to the extent such claims, losses, damages or expenses are caused by the indemnifying party's negligent acts, errors or omissions. In the event claims, losses, damages, or expenses are caused by the joint or concurrent negligence of ENGINEER or SUBCONSULTANT, they shall be borne by each party in proportion to its negligence.

### **STANDARDS OF CARE**

The standard of care for all professional services performed or furnished by SUBCONSULTANT under this Agreement will be the skill and care used by members of the SUBCONSULTANT's profession practicing under similar circumstances at the same time and in the same locality.

### **DISPUTE RESOLUTION**

Both parties agree they shall first submit any and all unsettled claims, counterclaims, disputes, and other matters in question between them arising out of or relating to this Agreement to mediation in accordance with the Construction Industry Mediation Rules of American Arbitration Association, effective as of this date of this agreement.

### **TERMINATION**

This agreement may be terminated with seven days written notice to SUBCONSULTANT for convenience or cause. SUBCONSULTANT may terminate this Agreement for cause with seven days written notice to the ENGINEER. Any payments due shall be paid (as described herein) for services rendered prior to termination.

**ENTIRETY OF AGREEMENT:** The terms and conditions of the Prime Agreement between ENGINEER and Client applicable to SUBCONSULTANT are incorporated herein by reference and SUBCONSULTANT agrees to be bound to ENGINEER to the same extent ENGINEER is bound to the Client. Notwithstanding the foregoing, to the extent applicable to SUBCONSULTANT, SUBCONSULTANT shall not be bound to Client or ENGINEER under Article 12 of the Prime Agreement. This Agreement (including Attachments 'A', 'B', and 'C') and the Prime Agreement embody the entire agreement and understanding between the parties hereto, and there are no other agreements and understandings, oral or written, with reference to the subject matter hereof that are not merged herein and superseded hereby. No alteration, change or modification of the terms of the Agreement shall be valid unless made in writing and signed by both parties hereto. In case of any conflict or inconsistency between the terms of this Agreement and the Prime Agreement (except for the exclusion of Article 12 of the Prime Agreement), the Prime Agreement shall govern.

**GOVERNING LAW**

This Agreement shall be governed by, and interpreted pursuant to, the laws of the State of Tennessee applicable to contracts made by parties domiciled in and to be wholly performed within the State of Tennessee. Any action or proceeding arising from or pertaining to this Agreement shall be brought in a state or federal court in the State of Tennessee, and the parties shall not challenge the law to be applied, the venue or jurisdiction.

**ASSIGNMENT** - Neither party may assign, sublet or transfer any of its respective rights claims, or duties under or any other interests in this Agreement, in whole or in part, without the prior written consent of the other party, except to the extent that any assignment, subletting or transfer is mandated by law.

**RIGHT OF ENTRY** – ENGINEER client will arrange for right-of-entry and access to the property for the purpose of performing studies, tests and evaluations required to perform the agreed services.

**SURVIVAL** - The conditions of this Agreement concerning consent to assignment and indemnification or allocation of responsibility or liability between the parties to this Agreement, shall survive the completion of the services under this Agreement and any termination of this Agreement.

**OWNERSHIP OF INSTRUMENTS OF SERVICE**

All reports, plans, specifications, field data and notes and other documents, including all documents on electronic media, prepared by SUBCONSULTANT as instruments of service shall remain the property of SUBCONSULTANT and may not be used by the ENGINEER or any party obtaining them through ENGINEER for any other endeavor without the written consent of SUBCONSULTANT. SUBCONSULTANT shall retain all common law, statutory and other reserved rights, including the copyright thereto.

**OPINIONS OF PROBABLE COST**

In providing opinions of probable cost, the ENGINEER understands that SUBCONSULTANT has no control over costs or the price of labor, equipment or materials, or over the Contractor's method of pricing, and that the opinions of probable construction costs provided during this project are to be made based on SUBCONSULTANT's qualifications and experience. SUBCONSULTANT makes no warranty, expressed or implied, as to the accuracy of such opinions as compared to bid or actual costs.

**QUALITY CONTROL (QC)**: If the SUBCONSULTANT is to provide deliverable documents to ENGINEER, the SUBCONSULTANT shall perform QC review of those documents and all supporting work products prepared by the SUBCONSULTANT upon which those documents are based. The SUBCONSULTANT shall follow appropriate and acceptable QC review and documentation procedures.

**SOFTWARE REQUIREMENTS**: All computer applications and software must be compatible with ENGINEER applications and standards and/or those required by the Client. All computers used by SUBCONSULTANT shall be equipped with anti-virus software. All electronically stored data shall have back-up no less often than daily.

**FORCE MAJEURE**: In the event that any party is unable to perform a force majeure event, the party affected by the force majeure shall have its obligation suspended for a period equal to the Force Majeure event, provided the party is taking reasonable steps to mitigate the impact of any force majeure event. The term "force majeure" shall be defined as including acts of God, insurrections, wars, terrorist acts, fires, floods, earthquakes, tidal waves, epidemics, quarantine restrictions, labor disputes, strikes, freight embargoes, unusually severe weather or other similar causes beyond the control or contemplation of either party.

### OAK RIDGE AIRPORT

#### PAYMENTS TO THE SUBCONSULTANT:

Upon this Agreement becoming effective, the SUBCONSULTANT is authorized to begin work on the scoped environmental consulting services as denoted herein and detailed in the attached scope of services.

Payment to the SUBCONSULTANT shall be as indicated below. The subconsultant will perform these services on a time and materials basis in accordance with the attached scope of services. The subconsultant will not perform any additional services than identified or exceed these costs without prior written approval.

*Task 1 – Phase I ESA, including review of prior DOE documentation - \$18,000*

*Task 2 – Jurisdictional Waters Determination and Floodplain Evaluation - \$30,900*

*Task 3 – T&E Species and Botanical Assessment - \$4,900 (field services concurrent with Task 2)*

*Task 4 – Cultural Resources Assessment \$80,000*

*Task 5 – Public Meetings, Project Meetings and Project Management \$16,240*

*Task 6 – Contingency Screening of Potential Stream or Wetland Mitigation Sites - \$8,000*

**TOTAL: \$ 158,040**

Invoices shall be submitted by the SUBCONSULTANT to the ENGINEER upon completion of services or prorated on a monthly basis. Within 10 business days after the ENGINEER receives payment from the Client for services covered by the SUBCONSULTANT'S invoice, ENGINEER shall pay SUBCONSULTANT'S invoice. However, provision of certificates of insurance required under this agreement is a pre-condition to any payment to the SUBCONSULTANT.

Each submitted invoice should indicate the amount of the contract, the amount currently billed, and the amount billed to date. All submitted invoices should denote the project name and the PDC Consultants, LLC job number as noted below. Failure to do so may delay processing.

## Timothy S. Schalk

### Environmental Scientist

Mr. Schalk has performed more than 900 Phase I Environmental Site Assessments (ESAs) using the American Society for Testing and Materials (ASTM) standard. His Phase I work has been for both public and private sector clients, and includes projects for commercial realtors, developers, and industrial clients in multiple states. His areas of expertise include: soil and groundwater quality assessments for active and inactive sites; underground storage tank (UST) removals and assessments; Phase I Environmental Site Assessments to define past usage of property and determination of the presence of potential environmental liabilities; asbestos in buildings assessments; and mold and indoor air quality assessments.

### Key Projects and Assignments

#### ***Numerous Phase I Environmental Site Assessments***

**Throughout middle and east Tennessee, Kentucky, Georgia, South Carolina, Mississippi, Kansas, and West Virginia | 1994-present**

Project Manager for Phase I ESAs. Clients included Flagstar Enterprises, Wal-Mart, the Loewen Group, Gulf and Ohio Railways, various developers, real estate agents, governmental agencies, and private individuals.

#### **Blount/Sevier Avenue Corridor Improvement Project Knoxville, Tennessee | 2013**

Responsible for preparing Hazardous Material Evaluation in support of Categorical Exclusion (CE) in accordance with the Tennessee Department of Transportation's (TDOT's) NEPA guidelines for the Blount/Sevier Avenue Corridor Improvement Project. The federally funded project includes the proposed roadway improvements to support the City's new park, Suttree Landing Park. Tasks included reconnaissance of sites, state regulatory interfacing, and interpretation of state and federal regulatory information.

#### **Clayton Road Extension to Support ProNova Alcoa, Tennessee | 2013**

Prepared a Hazardous Material Evaluation in support of a CE in accordance with the TDOT's NEPA guidelines. The state and federally funded project includes the proposed 2,000-foot extension of existing Clayton Road to support the future ProNova facility. Tasks included reconnaissance of sites, state regulatory interfacing, and interpretation of state and federal regulatory information.

#### **South Waterfront Pedestrian Bridge Knoxville, Tennessee | 2013**

Prepared a Hazardous Material Evaluation for the proposed South Waterfront Pedestrian Bridge, which will span the Tennessee River from the University of Tennessee's Thompson Boling Arena to the South Waterfront. The evaluation was conducted in accordance with the Tennessee Department of Transportation NEPA

*\*Experience with previous employer.*

requirements. Tasks included reconnaissance of sites, state regulatory interfacing, and interpretation of state and federal regulatory information.

### **Wrights Ferry Road Improvements**

**Alcoa, Tennessee | 2013**

Prepared a Hazardous Materials Evaluation for proposed improvements to a 1-mile section of Wrights Ferry Road in accordance with the Tennessee Department of Transportation NEPA requirements. Tasks included reconnaissance of sites, state regulatory interfacing, and interpretation of state and federal regulatory information.

### **Halls Greenway**

**Knox County, Tennessee | 2013**

Prepared a Hazardous Materials Evaluation for the proposed construction of 3,000 feet of greenway in Halls/Knox County, in accordance with the Tennessee Department of Transportation NEPA requirements. Tasks included reconnaissance of sites, state regulatory interfacing, and interpretation of state and federal regulatory information.

### **North Central Streetscapes**

**Knoxville, Tennessee | 2012**

Prepared a Hazardous Materials Evaluation for a 1-mile streetscapes project along North Central Street in accordance with the Tennessee Department of Transportation NEPA requirements. Tasks included reconnaissance of sites, state regulatory interfacing, and interpretation of state and federal regulatory information.

### **First Creek Greenway, Edgewood Park and Environs**

**Knoxville, Tennessee | 2012**

Prepared a Hazardous Materials Evaluation for the Edgewood Park and Environs greenway/sidewalk project in accordance with the Tennessee Department of Transportation NEPA requirements. Tasks included reconnaissance of sites, state regulatory interfacing, and interpretation of state and federal regulatory information.

### **Cityview Riverwalk Extension**

**Knoxville, Tennessee | 2012**

Prepared a Hazardous Materials Evaluation for the proposed Cityview Riverwalk Extension which was funded by the Tennessee Department of Transportation. Tasks included reconnaissance of sites, state regulatory interfacing, and interpretation of state and federal regulatory information.

### ***EPA-funded Brownfields Assessment Projects***

**Various Counties in East Tennessee | 2009-present**

Phase I ESA Environmental Professional conducting assessments of multiple brownfield sites addressed through funding provided under the EPA Brownfields Assessment Grant Program. Sites include former industrial buildings, commercial properties, health care and education facilities auto salvage yards, landfills, riverfront corridor properties, and vacant land.

*\*Experience with previous employer.*

### **Cellular Tower Environmental Assessments**

#### **Various southeast locations | 2009-present**

Project Manager conducting ESAs for new cellular tower installations and diesel generator installations at existing tower sites throughout the southeast. Assessment activities included field reconnaissances and interactions with state and federal agencies.

### **Phase I Environmental Site Assessments of Railroad Trackage**

#### **Tennessee, Kentucky, Georgia, Alabama, Mississippi, and Florida | 1996-2005**

Project Manager for several Phase I ESAs. Tasks included reconnaissance of sites, state regulatory interfacing, and interpretation of state and federal regulatory information.

### **NEPA - Environmental Assessments**

#### **Cleveland, Tennessee | 2000**

Project Manager for Environmental Assessments of two privately owned camps located in the Cherokee National Forest. The assessments were performed in cooperation with the US Forest Service and in accordance with the USEPA NEPA requirements.

### **Phase I ESA of a 200,000-square foot Manufacturing Facility**

#### **Dalton, Georgia | 1995**

Manager for Phase I ESA. Assessment included UST and AST assessments, asbestos inspection, and regulatory investigation utilizing established S&ME Protocols based on American Society for Testing and Materials (ASTM) Phase I Environmental Site Assessment Process Document 1527-97.

### **Hazardous Materials Building Survey of former High School**

#### **Tazewell, Tennessee | 2011**

Lead inspector for hazardous materials survey of a former high school being acquired by a community college. The buildings were assessed for asbestos, lead-based paint, and other universal wastes prior to planned renovations. The asbestos portion of the assessment was performed according to NESHAP standards.

### **Indoor Air Quality Assessment and Remediation of Multi-Story Office Building**

#### **Knoxville, Tennessee | 2011**

Lead Inspector for an indoor air quality assessment of a multi-story office building which had documented mold issues prior to occupation by a community college. The assessment included a visual inspection for water intrusion and mold and airborne mold sampling. Amplified airborne mold was identified in portions of the building. Follow-up inspections identified sources of water intrusion and mold, and remedial actions were recommended. Post-remediation sampling confirmed reduction of airborne mold levels to outside background levels.

*\*Experience with previous employer.*

### **Health Care Client**

**Knoxville, Tennessee | 2011**

Lead asbestos Inspector for asbestos and lead-based paint assessment of a large hospital campus being acquired by health care corporation. Hospital and medical professional buildings of various construction dates were assessed for asbestos and lead-based paint to allow for possible demolition, removal, and proper disposal of building materials or sale to outside party. Assessment performed according to NESHAP standards.

### **Hazardous Materials Building Survey of College Dormitory**

**Maryville, Tennessee | 2011**

Lead inspector for hazardous materials survey of a college dormitory prior to planned renovations. The multi-story building was assessed for asbestos, lead-based paint, and mercury, PCB, CFC-containing equipment and Universal Wastes. Recommendations for the management and/or disposal of identified hazardous materials were provided as part of the assessment.

### **Hazardous Materials Building Survey, Naval Reserve**

**Knoxville, Tennessee | 2010**

Lead inspector for a hazardous material survey of the Naval Operations Center in Knoxville prior to planned renovations. Services included asbestos and lead-based paint assessments and identification of equipment containing hazardous materials including mercury, CFCs, and PCBs and Universal Wastes. In addition, exterior soils were analyzed for RCRA metals. Recommendations for the management and/or disposal of identified hazardous materials were provided.

### ***Asbestos and Lead-Based Paint Surveys***

**Southeastern United States | 1996-present**

Project Manager responsible for performance and reporting of numerous asbestos and lead-based paint surveys throughout the southeast. Clients included development companies, retail and commercial businesses, and local and state governments.

### **Asbestos Project Monitoring of University Dormitory**

**Knoxville, Tennessee | 2010**

Project Monitor responsible for supervision of asbestos abatement activities at an eleven-story university dormitory during renovations. Responsibilities included daily area air monitoring and clearance sampling, pre- and post-inspections of abatement areas, and interfacing with general contractor and university officials.

### **Asbestos and Lead-Based Paint Surveys of University Buildings**

**Knoxville, Tennessee | 2009-2012**

Project Manager responsible for performance of asbestos and lead-based paint surveys of numerous university buildings. Responsibilities included survey planning and implementation, integration of survey results in the university database, and interaction with university personnel.

*\*Experience with previous employer.*

### **Asbestos and Lead-Based Paint Assessment**

**Knoxville, Tennessee | 2001**

Project Manager for assessment of asbestos and lead-based paint in buildings being acquired by a health care facility. Residence and outbuildings were assessed for asbestos and lead-based paint to allow for demolition, removal, and proper disposal of building materials. The assessment was performed according to NESHAP standards.

### **UST Removal and Site Closure at a Hospital**

**Knoxville, Tennessee | 1996**

Project Manager responsible for supervision of tank removal, soil and groundwater sampling and analysis, and state regulatory interfacing.

### **UST Removal and Site Closure**

**Decatur, Alabama | 1996**

Project Manager for removal of underground storage tank and subsequent site closure. Activities included supervision of tank removals, soil and groundwater sampling and analysis, and state regulatory interfacing.

### **Bioremediation of a Solvent Spill at a Manufacturing Facility**

**Little Rock, Arkansas | 1993**

Project Manager responsible for contaminated soil removal, aeration, and testing until contaminants were reduced to below detection limits. Interfaced with state regulatory authorities during remediation activities.

### **Database Manager for U.S. Air Force Underground Storage Tank (UST) Program**

Maintained database of USTs at 12 Air Force bases throughout the country. Utilized UST information to determine removal or upgrade requirements. Generated cost proposals for UST work performed at each base.

### Key Projects and Assignments

#### **Coal Combustion Residuals (CCR) Liabilities Program**

**Tennessee Valley Authority (TVA), Chattanooga, TN | 2017 – 2018**

Project Manager consultant hired to develop and execute a process to determine the long-term liability for managing CCR facilities (landfills, closed ash ponds, waste treatment systems, stability monitoring systems) for TVA's fleet of operating and closed Coal Combustion Power Plants. The project required the integration of a multi-disciplined team that included engineers, environmental compliance, waste management, construction, project managers, maintenance and financial managers, as well as interfacing with operations personnel at the coal plants in the TVA power generation fleet. The project identified the system requirements for CCR long term facilities, monitoring, maintenance and management, developed detailed cost estimates, and schedules. Utilized the Department of Energy's (DOE) Risk Management methodology from DOE Risk Management Guide DOE G 413.3-7A to evaluate risks, develop a risk register with the resulting impacts to costs and long-term liabilities. The risk register was used to determine the appropriate the financial liabilities for managing CCR facilities with the ability to cross cut by specific state waste regulations, specific plant site, and specific CCR unit to allow for future manipulation as risks were realized, regulations changed, and site closure schedules and requirements changed. The analysis of system requirements resulted in the identification of cost savings, that significantly impacted TVA operation costs and reduced the overall long-term liabilities.

#### **Brownfield Redevelopment for the East Tennessee Technology Park\***

**Oak Ridge, TN | 2015 – 2016**

Project Manager with a small minority owned business providing environmental services for DOE in Oak Ridge.

- Developed plan for the demolition and soil characterization and remediation of the East Tennessee Technology Park (ETTP) 161kV Switchyard to ready the yard for future reuse. Work included waste management for disposal and recycling. Required significant coordination and integration with the City of Oak Ridge Electrical Department and the DOE Environmental Management (EM) Site Contractor.

### **Oak Ridge, TN | 2009 - 2013**

Reindustrialization Manager for the ETPP. Managed a multi-discipline team to support the DOE and the Community Reuse Organization of East Tennessee (CROET) to develop the site into a sustainable industrial park:

- Performed site environmental assessments of land and buildings, including cultural resource and ecological assessments for redevelopment of property.
- Managed the planning and execution to decommission, demolish or refurbish existing utility facilities (Water, Sewage Treatment Plant, 161kV Switch Yard / 13.2 kV Power Distribution, Fire Protection Systems, Steam Plant, Air Plant). Integrated across the multiple site organizations Utilities, Security, Fire Safety, Emergency Management, and Cleanup Operations, private tenants., DOE and City of Oak Ridge
- Performed environmental and safety evaluations for leasing DOE property for private use and the use of bartering agreements to clean up or enhance the facility for reuse

### **Oak Ridge, TN | 2002 – 2009**

Manager of Projects / Project Manager for the D&D and remediation projects at the ETPP. Projects included the D&D of facilities with industrial hazardous and radiological contamination. Analytical Laboratories, Uranium Process Support Facilities waste storage facilities; remediation of classified landfill, various pits and soils; and disposal of hazardous waste.

- Working hand-in-hand with the DOE Client, managed the effort to develop, negotiate, and implement a streamlined CERCLA regulatory strategy for the D&D of facilities and follow on soil remediation
- Performed required environmental (NEPA), ecological, and historic preservation assessments and evaluations, negotiating and executing memorandums of agreement to address impacted facilities and sites.
- Developed a successful strategy for DOE to negotiate a Historic Preservation Agreement under Section 106 of the National Historic Preservation Act, resulting in the collection of site artifacts and original documents and drawings for use in a future Manhattan Project National Park and allowing the D&D of 108 historic buildings to proceed while further negotiations continued for the historic K-25 building.
- Performed environmental characterization for waste, remaining below grade basements and pits, soil cleanup, and groundwater to meet the requirements of the CERCLA ROD, and regulatory industrial standards for future reuse.

### **Engineering Management at Oak Ridge National Laboratory\***

#### **Oak Ridge, TN | 1999 – 2002**

Project Engineer for the ORNL Environmental Management Projects. Managed a staff of 20 engineers and scientists. Responsible for technical management of environmental projects (groundwater, tank remediation, landfills, and D&D), Environmental Compliance (NEPA), utilities (locates and disconnects), as-built conditions. Served as point of contact and coordinated with UT-Battelle Engineering.

- Working hand-in-hand with the DOE Client, managed the effort to develop, negotiate, and implement a streamlined CERCLA regulatory strategy for the D&D of facilities and follow on soil remediation
- Performed required environmental (NEPA), ecological, and historic preservation assessments and evaluations, negotiating and executing memorandums of agreement to address impacted facilities and sites.
- Developed a successful strategy for DOE to negotiate a Historic Preservation Agreement under Section 106 of the National Historic Preservation Act, resulting in the collection of site artifacts and original documents and drawings for use in a future Manhattan Project National Park and allowing the D&D of 108 historic buildings to proceed while further negotiations continued for the historic K-25 building.
- Performed environmental characterization for waste, remaining below grade basements and pits, soil cleanup, and groundwater to meet the requirements of the CERCLA ROD, and regulatory industrial standards for future reuse.

## Eric M. Solt, PG

### Senior Geologist/Senior Reviewer

Mr. Solt is a Senior Geologist who manages the Environmental Services Department at S&ME's Knoxville Branch. With 27 years of environmental experience, his areas of proficiency include: geologic investigations; regulatory compliance; Phase I and Phase II Environmental Site Assessments (ESA); UST/AST closure; petroleum and organic solvent-related site assessment design and oversight; solid and hazardous waste evaluation, permitting and management; soil and groundwater remediation system design, remediation construction management, and operation and maintenance; asbestos and lead-based paint surveys; abatement project design and abatement management; indoor air quality and mold assessment and remediation; and preparing health and safety plans. Mr. Solt is also a certified S&ME Senior Reviewer.

### KEY PROJECTS AND ASSIGNMENTS

#### Verizon Wireless

##### Various Locations | Tennessee, Virginia, Arkansas, Mississippi, Georgia

Project Senior Reviewer for Phase I ESAs for both raw and co-location sites. Has provided senior review for Phase I ESAs and ESA updates for more than 100 Verizon Wireless sites through multiple S&ME branches. Also works closely with Verizon's environmental legal counsel to incorporate current Verizon-specific requirements regarding report content and format.

#### Former Paint and Varnish Manufacturer

##### Hamilton County, Tennessee | 2012-present

Project Manager for the assessment and monitoring of groundwater and soil vapor at a former paint and varnish manufacturing facility located on approximately 30 acres adjacent to the Tennessee River in downtown Chattanooga. After production concluded in the mid-1990s, the property was subdivided and portions of the manufacturing facility were demolished in preparation for site redevelopment. Commercial redevelopment has occurred on several parcels, with redevelopment pending on others. S&ME is currently conducting groundwater monitoring and additional soil vapor assessment and remediation design to assist in facilitating multiple parcel owners with full site redevelopment.

#### Vapor Intrusion Assessment for Commercial Property

##### Knoxville, Tennessee | 2012

Project Manager for the assessment of vapor intrusion potential at a former dry-cleaning facility and current commercial property. The assessment techniques included soil gas using passive detectors, sub-slab vapor sampling using post-run tubing and summa canisters, and indoor ambient air sampling. The assessment results were used by the Tennessee Department of Health in determining potential health risks for users and occupants of the building to return the property to active commercial use.

*\*Experience with previous employer.*

### **Former Brookside Mills Site**

**Knoxville Tennessee | 2003, 2012**

Project Manager for the subsurface evaluation of a 20-acre historic knitting mill site. All buildings had been demolished by the time of the assessment, therefore the assessment design included integration of Sanborn maps and historic aerial photographs using GIS to aid in determining relevant sample locations. Historic GIS data was integrated with current high resolution aerial photography and sub-meter GPS to identify sample locations in the field. The assessment included surface and soil, plus groundwater and surface water evaluation. Served as Environmental Project Manager for brownfield compliance during redevelopment of the property in 2012.

### **EPA-funded Brownfields Community-Wide Assessment - Knoxville Downtown North I-275 Corridor**

**Knoxville, Tennessee | 2011-present**

Senior Reviewer for community-wide assessment grant project under EPA Brownfields Program. Project activities completed to date include Project Area Environmental Database Inventory and amendment of Generic Quality Assurance Project Plan.

### **Municipal Garage and Administrative Offices (Multiple Properties)**

**Blount County, Tennessee | 2006, 2010 & 2011**

Project Manager for Phase I ESAs, Phase II ESAs and facility hazardous materials surveys. The Phase II ESAs included the assessment of soil and groundwater. Hazardous materials surveys included asbestos, lead paint, PCB equipment, mercury-containing devices, and universal wastes.

### **United States Postal Services Facilities**

**East Tennessee | 2009 & 2011**

Project Manager for facility roof surveys. Services included the collection and description of roofing materials from surface to metal deck, documentation of deck conditions, and analysis of materials for asbestos and foam materials for phenols. Surveys also included infrared imaging to determine potential areas of leaks/water infiltration.

### **On-Call Industrial Hygiene Services, University of Tennessee**

**Knoxville, Tennessee | 2010-present**

Project Manager/Coordinator and Senior Reviewer for on-call asbestos/industrial hygiene services for the UT Campus Facilities Services Department. Typical services provided include: expedited pre-renovation asbestos surveys, bulk material sampling, analysis and reporting, abatement design specifications, and abatement air monitoring clearance sampling. Also conducting asbestos management inspections and plans for facilities regulated under AHERA.

### **University of Tennessee Cherokee Farm**

**Knoxville, Tennessee | 2010**

Project Manager for the delineation, material characterization, and disposal permitting of a pre-RCRA municipal/medical waste accumulation area. The waste material was discovered during mass grading for a large redevelopment project,

*\*Experience with previous employer.*

and the removal was therefore time-critical. The project required the accelerated negotiation of a state-issued disposal permit and the documentation of material removal and disposal for cost confirmation on behalf of the owner. Post-removal soil sampling and regulatory reporting was also conducted to obtain "case closure" from TDEC.

### **Blount Avenue Improvements**

**Knoxville, Tennessee | 2010**

Senior Project Manager for Phase I ESA, Phase II ESA, disposal permitting and remediation confirmation sampling in support of the reconfiguration of utilities and widening of Blount Avenue in downtown Knoxville. Conducted pre-construction soil probing and sampling along the corridor to provide an estimate of contaminated material for disposal permitting. Coordinated soil segregation and disposal during construction phase.

### **Hazardous Materials Survey, Naval Reserve Facility**

**Knoxville, Tennessee | 2010**

Project Manager for a pre-renovation hazardous materials survey. Assisted in the collection of material samples for analysis for asbestos and lead-based paint, and collected soil samples for analysis for RCRA metals. Completed an inventory of universal waste materials, PCBs, mercury-containing equipment and moisture intrusion conditions and mold. Provided recommendations for the management and/or disposal of identified hazardous materials.

### **EPA-funded Brownfields Community-Wide Assessment - Knoxville South Waterfront**

**Knoxville, Tennessee | 2009-present**

Senior Reviewer for community-wide assessment grant project under EPA Brownfields Program. Project activities include preparation of Project Area Environmental Database Inventory, Phase I ESAs, Generic and Site-Specific Quality Assurance Project Plan Preparation, and Phase II ESAs. Phase I assessment projects completed include a 3-acre metal fabricating facility, a 23-acre medical facility compound comprised of 6 individual parcels and a former drycleaner and petroleum bulk plant.

### **Asbestos Survey, Abatement Design and Abatement Project Monitoring, Carrick Hall University of Tennessee**

**Knoxville, Tennessee | 2009-2010**

Project Manager for pre-renovation asbestos survey for a seven-story residence hall. Asbestos survey information was used to create an asbestos abatement design specification for use by prospective abatement contractors in process and during the abatement project. During abatement, S&ME served as the owner's representative in conducting daily project monitoring, air sampling and on-site analysis, and post-abatement inspections and final clearance sampling.

### **Former Municipal Waste Disposal Area**

**Knox County, Tennessee | 2009**

Project Manager for a site assessment to determine the approximate areal extent, cover thickness, and residual landfill gas potential for a pre-RCRA municipal

*\*Experience with previous employer.*

waste disposal area in an urban setting. Data obtained from historic aerial photographs, topographic maps, and personnel interviews were integrated using GIS for the assessment planning and design. Assessment techniques included the use of a Geoprobe® to determine cover thickness and nature of waste material, and to install a post-run tubing system for gas collection and analysis.

### **EPA-funded Brownfields Community-Wide Assessment**

#### **East Tennessee | 2008-2010**

Senior Reviewer for 16-county community wide assessment under EPA Brownfields Assessment Grant Program. Project included the implementation of Phase I ESAs for properties including a knitting mill, petroleum bulk plant, furniture manufacturer, historical landfill, and riverfront corridor.

### **Aluminum Manufacturing Facility**

#### **Blount County, Tennessee | 2006-2007**

Project Manager for comprehensive building materials inventory at multiple facilities that included the identification, sampling, analysis and labeling of all identified asbestos-containing materials. The project included approximately 90 buildings or structures at the facility.

### **NETWM Landfill**

#### **Rogersville, Tennessee | 2005-present**

Hydrogeologist and Senior Reviewer for the compliance monitoring and assessment of corrective measures at a municipal solid waste landfill. Current project tasks include semi-annual groundwater compliance monitoring, statistical analysis of data and annual groundwater use surveys.

### **Blount County Highway Department**

#### **Alcoa, Tennessee | 2005**

Project Manager for facility investigation that included the environmental assessment of a 19-acre county vehicle maintenance garage and the delineation of pre-RCRA municipal landfill cells located on the site. Historic aerial photographs were geo-referenced and imported to handheld GPS for use in the field to establish test pit locations for the confirmation of landfill extent, which greatly expedited the landfill delineation. Environmental assessment and landfill delineation information was used to negotiate a Brownfield agreement. The site has been successfully redeveloped as a major retail center.

### **Former Metal Fabrication Facility**

#### **Knoxville, Tennessee | 2005**

Project Manager for pre-purchase due diligence and Phase II Environmental Site Assessment of a former large-scale industrial metal fabrication facility. The assessment also included test pit and drilling evaluation of a portion of the facility that included a coal tar disposal area associated with a historic gas light production facility.

### **Former Plasti-Line Facility**

#### **Knoxville, Tennessee | 2005**

Project Manager for pre-purchase due diligence Phase I and Phase II Environmental Site Assessment of a former thermoplastic molding facility.

*\*Experience with previous employer.*

### **Marathon Ashland Light Products Terminal**

**Knoxville, Tennessee | 2004**

Project Manager for soil sampling and delineation of shallow petroleum contamination prior to facility upgrades. Also assessed and documented soil cleanup efforts relative to a gasoline release at a pipeline manifold.

### **Burgin Dodge**

**Knoxville, Tennessee | 2003**

Project Manager for a facility assessment driven by property transaction. Duties included review of existing environmental documents and reports; a Geoprobe® assessment of the maintenance area; the installation and sampling of groundwater monitoring wells; and the coordination of facility upgrades to meet buyer requirements. Project was expedited for completion in time for closing of sale, and facility was granted no further action by state regulatory agency.

### **Former Injection Molding Facility**

**Blount County, Tennessee | 2003**

Project Manager responsible for facility assessment to determine the extent of migration of hydraulic oils beneath the process area floor slabs. Assessment also included air rotary drilling to evaluate site groundwater.

### **Pilot Oil Corporation and Pilot Travel Centers, LLC**

**Various Southeast Locations | 2002-2009**

Project Manager for Phase I and Phase II pre-purchase due diligence environmental services. Responsibilities included contract management and development and implementation of site assessment plans. Property assessments included both developed and undeveloped parcels.

### **Former Lay Packing Facility**

**Knoxville, Tennessee | 2002-2005**

Project Manager for pre-purchase environmental due diligence and regulatory-driven assessment for a former meat processing facility. The assessment of the six-acre facility included a Phase I ESA, asbestos survey, hazardous materials inventory, and soil and groundwater assessment. Post-purchase services included the sampling and in-place closure of two 20,000-gallon fuel oil heating tanks.

### **Proposed Municipal Service Center**

**Alcoa, Tennessee | 2002-2003**

Project Manager for the Phase II Environmental Assessment of a former manufacturing facility with pre-RCRA municipal landfill cells located on the property. The assessment utilized test pits, soil borings and Geoprobe® investigation techniques to document soil conditions in the vicinity of the manufacturing areas, and to define boundaries of historic landfill cells relative to proposed structures. Environmental services also included a landfill cover thickness and residual methane evaluation, and a hazardous materials survey in the powerhouse, production, and drying kiln buildings.

*\*Experience with previous employer.*

### **Former Industrial Complex**

#### **Elizabethton, Tennessee | 2002**

Project Geologist for Phase II Environmental Site Assessment prior to site redevelopment. Project included review of historic facility operations and environmental compliance issues, assessment design, plus subsurface investigation and reporting. Assessment results were used to successfully negotiate a Brownfield agreement for the site which aided in site redevelopment as a large retail center.

### **Auto Dealership**

#### **Clinton, Tennessee | 2002**

Project Manager responsible for the evaluation of possible sources of free product emanating from wet-weather springs down-gradient from the facility. Product source was determined and rock coring was used to evaluate routes of migration in karst bedrock.

### **Motiva Bulk Fuel Terminal**

#### **Nashville, Tennessee | 2000**

Project Manager for the soil and groundwater assessment relative to an aboveground release from a one million-gallon fuel storage tank.

### **Retail Fuel Outlets**

#### **Nine sites in Western and Central North Carolina | 1999-2001**

Project Manager responsible for procurement, scheduling, and field services management for soil and groundwater remediation system construction projects.

### **Anniston Army Depot**

#### **Anniston, Alabama | 1999**

Project Manager for LNAPL free product recovery system evaluation using mobile enhanced multi-phase extraction to determine aquifer parameters and free product production at various vacuum and flow rates.

### **Equiva, LLC (Chevron/Texaco)**

#### **Various sites in Tennessee | 1997-2001**

Project Manager and point of contact for underground storage tank and environmental services in middle and east Tennessee. Responsibilities included contract management, development of site assessment and corrective action plans, remediation system procurement, construction, and operation and maintenance, plus negotiation of site closures, as well as UST trust fund reimbursement management. Also conducted Phase I ESAs for facility transfers.

### **Retail Fuel Outlet**

#### **Sevierville, Tennessee | 1993-1996**

Project Manager for the assessment and remediation of a hydrocarbon release. Project included full delineation of phased product and dissolved phase hydrocarbon plume encroaching on the Little Pigeon River; installation of a cutoff product recovery trench, recovery wells and a multi-phase extraction and remediation system; NPDES permitting and monthly monitoring and remediation progress monitoring.

*\*Experience with previous employer.*

### **Bulk Fuel and Pipeline Terminal**

**Knoxville, Tennessee | 1992-1993**

Project Geologist responsible for a groundwater assessment to determine the source of large quantities of free product existing at the facility. Used geophysical assessment to determine bedrock profile to aid groundwater assessment planning.

### **Baptist Hospital**

**Knoxville, Tennessee | 1992**

Project Geologist responsible for the location, design, and installation of groundwater recovery wells in karst bedrock. Wells were installed using air rotary drilling. Well installation involved the casing of non-impacted water bearing zones.

### **Hoechst Celanese**

**Salisbury, North Carolina | 1990**

Environmental Scientist responsible for asbestos air monitoring program for plant maintenance and upgrades.

### **BASF Fibers**

**Enka, North Carolina | 1988-1991**

Environmental Scientist responsible for asbestos air monitoring and project monitoring program during industrial powerhouse demolition. Duties included bulk sampling of suspect materials, pre-abatement inspection of work area containments; personnel, work area and containment monitoring during abatement; plus clearance sampling and analysis of air samples by phase contrast microscopy (PCM). Duties also included the scheduling and supervision of IH sampling technicians conducting air monitoring for other abatement projects conducted at the facility.

S&ME Project No. 4143-20-082

Dear Mr. Paslick:

S&ME, Inc. (S&ME) has completed a review of available documents and previous archaeological and historic resources reports. This work was authorized by Goodwyn Mills Cawood (GMC) through execution of a Subconsultant Agreement on March 29, 2021.

We performed this study in support of planning and development of a proposed airport at the East Tennessee Technology Park (ETTP), which was formerly the site of the K-25 Gaseous Diffusion Plant, and other U.S. Department of Energy production and research facilities.

## ◆ Regulatory Requirements

This project will include funding and/or permitting from the Federal Aviation Administration (FAA). As such this project is subject to review under the National Environmental Policy Act of 1969 (NEPA). S&ME, under the direction of GMC, is supporting GMC efforts to develop an Environmental Assessment (EA). This project is also subject to review under the National Historic Preservation Act (54 U.S.C. 300101 *et seq.*). The implementing regulations (36 CFR 800.3(a)(1)) state that "If the undertaking is a type of activity that does not have the potential to cause effects on historic properties, assuming such historic properties are present, the agency official has no further obligations under Section 106, or this part". By definition (36 CFR 800.16(i)) an "effect" is an "alteration to the characteristics of a historic property qualifying it for inclusion in or eligibility for the National Register". The construction of the proposed airport has the potential to cause effects to the historic properties that are assumed to be present, therefore Section 106 consultation is required.

## ◆ Area of Potential Effect

The Area of Potential Effect (APE) includes the footprint of the proposed airport and areas that will be potentially subject to ground disturbance from tree clearing, equipment laydown, and other construction related activities that could cause direct effects. This Direct APE is northwest of State Route 58 and includes portions of the ETTP that were previously developed as well as wooded undeveloped areas. Blair Road, a U.S. Department of Energy Haul Road, and both overhead and underground utilities cross the APE.

The indirect APE is a 3,000-foot buffer that, based on modeling will contain potential 55 db noise levels from aircraft. Given the local topography, in a valley between two ridges, a 3,000-foot buffer will also serve as an appropriate APE for potential visual impacts (Figures 1-4).

## ◆ Previous Investigations

Four previous investigations have been conducted within the APE (Figures 1 and 2).

1. In 1974 the University of Tennessee conducted an archaeological survey of the Oak Ridge Reservation. This study's stated goal was to identify prehistoric sites, but the investigators also documented resources dating to the historic period (Fielder 1974).
2. An architectural and archaeological survey of the K-25 Site and surrounding areas was conducted in 1994 (Morris 1998). This investigation concluded that the earthmoving associated with the K-25 plant and other facilities would have likely destroyed subsurface archaeological deposits. At the time of the survey, timber was being cleared due to the southern pine beetle infestation. This timbering caused extensive ground disturbance.
3. The *Phase I Archaeological Survey of Parcel ED-3 and Historic Assessment of the Happy Valley Worker Camp, Roane County, Tennessee* (Reed et al. 2008) survey investigated 182 acres in an attempt to identify the Happy Valley temporary worker housing area. The Happy Valley survey is outside of the Direct APE on the opposite side of U.S. SR 58.
4. The *Phase I Archaeological Survey of Portions of Site 40RE224, The Wheat Community, Roane County, Tennessee* (Callahan-Mims and Avery 2014) consisted of an archaeological investigation at the former location of five houses owned by John E. Arnold (711A and B), Sallie Belle Patton (722A), Ralph L. Phillips (725A), and Warren E. Jones (728A), and a barn owned by C.C. Watson (726A), and the location of the Roane College at the time that the property was purchased by the U.S. War Department.

## ◆ Resources in the APE

Previous investigations have identified a variety of resources in the APE (Figures 3 and 4).

**K-25 facility** – A Memorandum of Agreement (MOA) for the interpretation of historic properties at ETPP was executed in 2012. The MOA stipulates preservation of the K-25 Preservation Footprint and includes development of an equipment building and viewing tower to display equipment from the K-25 facility. A history center will also be developed in the Fire Station housed in building K-1652. The proposed undertaking will have no effect on this resource.

**Happy Valley Worker Camp (40RE577)** – The identified resources associated with the Happy Valley Worker Camp are identified with site number 40RE577. These resources are eligible for inclusion on the National Register of Historic Places (NRHP) under Criterion A for their association with the Manhattan Project (Reed et al. 2008). The proposed undertaking will have no effect on this resource.

**Wheat Community Archaeological District (40RE224)** – Site 40RE224 includes the George Jones Memorial Baptist Church, the George Arnold Property (site 711B), and Roane College.

George Jones Memorial Baptist Church was listed on the NRHP in 1992 and is significant under Criterion A for its association with the social history of the Wheat community, especially in reference to the Manhattan Project. The church is significant under Criterion C as a good example of the type vernacular churches that were commonly constructed in rural areas.

Callahan-Mims and Avery (2014) found Sites 711A (John E. Arnold Property), 725A (Ralph Phillips Property), 726A (Chester C. and Hattie Watson Property), 728-1 and 728-2 (Warren E. Jones Property), and CRA-1 not NRHP-eligible and recommended that further investigation of these sites was not warranted. Site 722A (Sallie Belle Patton Property) was not relocated during the 2014 survey. Callahan-Mims and Avery recommended additional investigations to evaluate the significance of Roane College and the George Arnold Property (Site 711B) and determine whether they contribute to the significance of the Wheat Community Archaeological District. Implementation of the proposed undertaking will adversely affect the George Jones Memorial Baptist Church and other historic properties, if present, in the Wheat Community Archaeological District.

**Cemeteries** – There are five cemeteries located within the indirect APE outside of the proposed airport construction limits. The Wheat Community African Burial Ground is located east of SR 58 and a cemetery associated with the Crawford Cumberland Presbyterian Church is located near the interchange of SR 58 and SR 95. The Ellis Cemetery is north of the Direct APE along Blair Road, and the Gallaher and Welcker cemeteries are south of the Direct APE near the confluence of Poplar Creek and the Clinch River.

The George Jones Memorial Cemetery is located adjacent to the church and within the Direct APE.

Cemeteries are not usually considered eligible for listing in NRHP; however, they can be eligible under certain Criteria Considerations, usually Criteria Consideration D. Criteria Consideration D states that: “a cemetery is eligible if it derives its primary significance from graves of persons of transcendent importance, from age, from distinctive design features, or from association with historic events.” The cemeteries are small family plots or associated with a church, a pattern typical of a rural community. The people interred in the nearby cemeteries are multiple members of the Wheat Community, or were enslaved by members of the Wheat Community, and lived in the area, none of whom have been identified by past studies as being of transcendent importance.

## ◆ Discussion

The majority of the Direct APE has been impacted by either the development, use, and subsequent demolition of the K-25 facility or other land uses such as historic period farming and more recent timbering activities. As such a systematic archaeological survey for the proposed undertaking is not necessary.

The NRHP-listed George Jones Memorial Baptist Church and its associated cemetery, as well as two currently unevaluated resources (George Arnold Property [Site 711B], and Roane College) are in the Direct APE. We recommend a project design that avoids potential effects to significant resources or if avoidance is not feasible development of a MOA to address the adverse effects.

◆ **Closing**

We appreciate the opportunity to provide the cultural resources services for this project. If you have any questions regarding the information in this letter, please contact us by email at [abrummitt@smeinc.com](mailto:abrummitt@smeinc.com) or by telephone at 843.972.0100.

Dear Shari and Casey,

S&ME, Inc. (S&ME) is submitting this report to present the results of the jurisdictional waters evaluation completed by S&ME in April 2021 on approximately 475 acres of land northwest of the Oak Ridge Turnpike near the intersection with Blair Road in Oak Ridge, Roane County, Tennessee. The property is proposed for the development of the Oak Ridge Airport, and portions of the site were previously used for Department of Energy (DOE) operations. The following report details the wetland and stream delineation performed by S&ME and includes background information, methodology, observed waters of the U.S. (WOUS) and waters of the state (WOTS), and relevant figures and photographs.

S&ME is providing this Jurisdictional Waters Report for your review and requests U.S. Army Corps of Engineers (USACE) and Tennessee Department of Environment and Conservation (TDEC) verification of the WOUS and WOTS at the site. We will contact you to schedule a site visit, if required. In the meantime, if you have any questions regarding this report please feel free to contact us.

Sincerely,

## 1.0 Project Description

The City of Oak Ridge (the City) proposes to construct a new airport on approximately 475 acres of land northwest of the Oak Ridge Turnpike near the intersection with Blair Road in Oak Ridge, Roane County, Tennessee (Figure 1, Appendix I). Portions of the site were previously used for Department of Energy (DOE) operations for the K-25 uranium enrichment facility site, which the DOE has been working for more than 10 years to reclaim for industrial use. The proposed project is located in the area now known as the Heritage Center Industrial Park. The proposed airport will assist in the revitalization of the industrial park and the City anticipates that it will prove to be an economic generator bringing jobs and visitors from around the country to the region.

## 2.0 Literature and Database Review

Prior to our site visit, S&ME performed a literature review of the subject property to determine potential areas of concern to be evaluated while in the field. This included a review of the U.S. Geological Survey (USGS) 7.5-minute topographic quadrangle map, the Tennessee Department of Environment and Conservation (TDEC) 303(d) draft list, U.S. Fish and Wildlife Service (USFWS) National Wetland Inventory (NWI) maps, historic aerial photographs, and the Natural Resources Conservation Service (NRCS) soil survey database.

The property is located on a portion of the U.S. Geological Survey (USGS) Topographic Quadrangle maps for Elverton and Bethel Valley, Tennessee (Figure 1, Appendix I), and the latitude and longitude near the center of the site are 35.932520°N, -84.380392°W. According to the topographic map, TDEC stream database, and NWI map (Figure 2, Appendix I), the Clinch River and Poplar Creek embayment flow across the southwestern portion of the site; one additional blue-line stream flows to the northwest near the center of the project area. Three additional open-water areas are also shown on the topographic and NWI maps near the southwestern corner. Field verification by S&ME confirmed the presence of the features shown on the topographic, NWI, and TDEC database maps; however, multiple other streams and wetlands not identified during the database review were also delineated during the site visit.

The entire site drains to the 8-digit Lower Clinch River watershed (06010207), and the majority of the site drains to the 12-digit Hydrologic Unit Code (HUC) Poplar Creek Lower watershed (060102070303). However, the northeastern-most corner where trees will be cleared for the runway protection zone (RPZ) drains to the East Fork Poplar Creek 12-digit HUC watershed (060102070302). The entire site is also located within the Southern Limestone/Dolomite Valleys and Low Rolling Hills (67f) ecoregion.

Current NRCS soil survey data for DOE property is not available. However, an Environmental Assessment (EA) completed by DOE in 2016 referenced a soil survey created in 1942, prior to the start of DOE operations. The EA showed soils mapped within the proposed airport construction limits. The map and soils type with descriptions provided in the 2016 DOE EA are shown on Figure 3 (attached).

### 3.0 Field Review

S&ME personnel visited the site in April 2021 to locate and delineate waters of the U.S. (WOTUS) and waters of the state (WOTS) within the project area. The primary site-development area is bordered by Perimeter Road and the Poplar Creek Embayment to the southwest, Oak Ridge Turnpike to the south/southeast, forest to the north/northeast/northwest, and the K-25 Site footprint to the west. The surrounding area is primarily forest on all sides except for the north, which consists of the K-25 Site that is currently in the demolition, cleanup, and redevelopment stages. Additional small polygonal areas are also located to the southwest and northeast of the primary airport site. These areas will require tree clearing within the proposed RPZ; these areas are surrounded by mature forest.

Due to historical use of the site, the southwest third of the site is comprised of buildings, pavement, roads, utilities, stormwater ponds, and lawn. The remainder of the site consists of mature and successional forest transected by roads, cleared powerline easements, and church/cemetery grounds.

During S&ME's site visits, 17 perennial/intermittent streams (S1-S17), 10 wet weather conveyances (WWCs)/ephemeral streams (WWC/ES1-WWC/ES10), 28 wetlands (WA-WCC, excluding WD<sup>1</sup>), and four open water areas (OW1-OW4) were observed within the evaluation boundary. The locations of the potentially jurisdictional waters are shown in the attached Jurisdictional Waters Maps (Figure 4 and Figures 4A – 4C, Appendix I); representative photographs of these features are also attached (Figure 5, Appendix I).

#### *Drainage Feature Assessment*

Two S&ME Qualified Hydrologic Professionals (QHPs) trained in the TDEC *Guidance for Making Hydrologic Determinations* (the Guidance) performed an evaluation of the site to identify and characterize on-site drainage features. The Guidance recommends that site visits occur at least 48 hours following a significant rain event so that the presence of stormwater doesn't influence the stream classification scoring. S&ME visited the site multiple times between April 6<sup>th</sup> and April 29<sup>th</sup>, 2021, so previous rainfall varied depending on the date of the site visit. Most of the stream/WWC determinations were performed using the primary indicators for *flowing water in channel 7 days after rainfall >0.1"* and *watercourse being dry anytime between February and April 15<sup>th</sup> under normal circumstances*. According to the USACE Antecedent Precipitation Tool, Version 1.0, calculation of normal weather conditions (attached in Appendix II), S&ME also determined that the evaluation period (i.e., the prior three months) has been normal. Twenty-seven drainage features were identified by S&ME during the site visit.

S1 is a short, wide drainage with moderate flow that exits an outfall, flows into a road-crossing culvert, and exits into WA. This stream is likely a continuation of S9, which is a larger second-order stream on the northcentral portion of the site that flows southwest and enters a culvert, where it appears to go underground and flow beneath the former DOE area.

---

<sup>1</sup> WD was delineated prior to a revision of the project boundary, which excluded WD from the evaluation area. Rather than renumbering the wetlands (which correspond to labeled flags in the field), details for WD were removed from this report.

## Jurisdictional Waters Report

### Oak Ridge Airport

Oak Ridge, Roane County, Tennessee

S&ME Project No. 4143-20-082

S2 is a small first-order stream that originates at a headcut below WWC/ES2. It provides hydrology to wetland WE before exiting the site to the north.

S3 through S6 and S14 are all tributaries within the same local watershed. S3 is a first-order tributary that starts at a wetland (WF) and flows north. It converges with S4 near the edge of the evaluation boundary. S4 is a large second-order stream that flows southwest across the western half of the site. It starts at a headcut just below WWC/ES6 and ultimately exits the site to the west. S5 and S6 are also first-order tributaries that flow north to converge with S4. S14 is a small seep-fed tributary that converges with S4 and originates at wetland WY as a groundwater-fed wetland.

S7 and S8 are both small first-order streams that flow offsite to the south. Each tributary obtains hydrology from groundwater seeps, wetlands, and overland stormwater flow.

S9 through S13 are tributaries that converge and contribute flow offsite to the west as S9. S9 is a larger second-order stream that flows southwest where it goes underground below the former DOE area; it most likely outfalls on the west side of the site as S1. S10 through S13 are all first-order tributaries to S9 and are influenced by multiple wetlands.

S15 through S17 are tributaries within the same local watershed. S15 is a larger incised stream that flows to the northeast; it begins at wetland WBB just below WWC/ES7. S16 and S17 are both small tributaries to S15. S16 comes from offsite, and S17 begins just below a headcut at WWC/ES8.

WWC/ES1 and WWC/ES9 are both small, isolated ditches with small amounts of water and ordinary high-water marks (OHWMs). WWC/ES3 and WWC/ES4 connect wetlands WM and WL to S7. WWC/ES5 connects wetland WT to S12. WWC/ES10 is a small drainage to S4.

All drainage features observed onsite were assessed using the TDEC Guidance, which provides a score for each stream's geomorphic, hydrologic, and biological characteristics. The individual stream descriptions and their corresponding scores can be found on the completed TDEC Hydrologic Determination Field Data Sheets in Appendix II.

### *Wetland Assessment and Delineation*

According to the 1987 *Corps of Engineers Wetlands Delineation Manual* and the *Regional Supplement to the Corps of Engineers Wetland Delineation Manual: Eastern Mountains and Piedmont Region* (2012), an area must meet three criteria to be considered a jurisdictional wetland. The three criteria are hydric soils, hydrophytic vegetation, and wetland hydrology. If any one of the three criteria are absent, the area is not considered a jurisdictional wetland. An S&ME professional wetland scientist (PWS) and an S&ME staff scientist performed a field review of the site, investigating low-lying areas and valleys that may have the potential for extended periods of saturation, areas mapped by the NRCS soil survey as possessing hydric soils, as well as areas shown on the NWI map as either streams or wetlands. Within the property, 28 wetlands and four open water areas were observed.

Wetland WA is the largest wetland within the evaluation area and is connected to the Poplar Creek embayment to the west by a road culvert. It is a palustrine emergent (PEM) wetland with a large portion of open-water habitat (OW1). Wetland WB and WC are separated from WA by a railroad track; they each also have open-water habitat (OW2 and OW3) near the deeper, central portion of the delineated boundaries. WB is palustrine scrub-shrub (PSS)

and WC is PEM during the growing season. OW4 is an isolated pond with no wetland fringe. Wetlands WJ and WK are also PEM wetlands connected to stream S5.

Wetlands WE, WH, WI, WM through WP, WR through WZ, WAA, and WBB are all palustrine forested (PFO) wetlands that are connected to various streams throughout the site, except for WW which is isolated. Wetlands WF, WG, WL, WQ, and WCC are PSS wetlands all connected to streams. All wetlands shown on Figures 4, and 4A through 4C (Appendix I) had hydric soils, hydrophytic vegetation, and primary and secondary hydrology indicators. More detailed descriptions of the wetlands can be found in Appendix III on the USACE Wetland Determination Data Sheets.

## 4.0 Conclusion

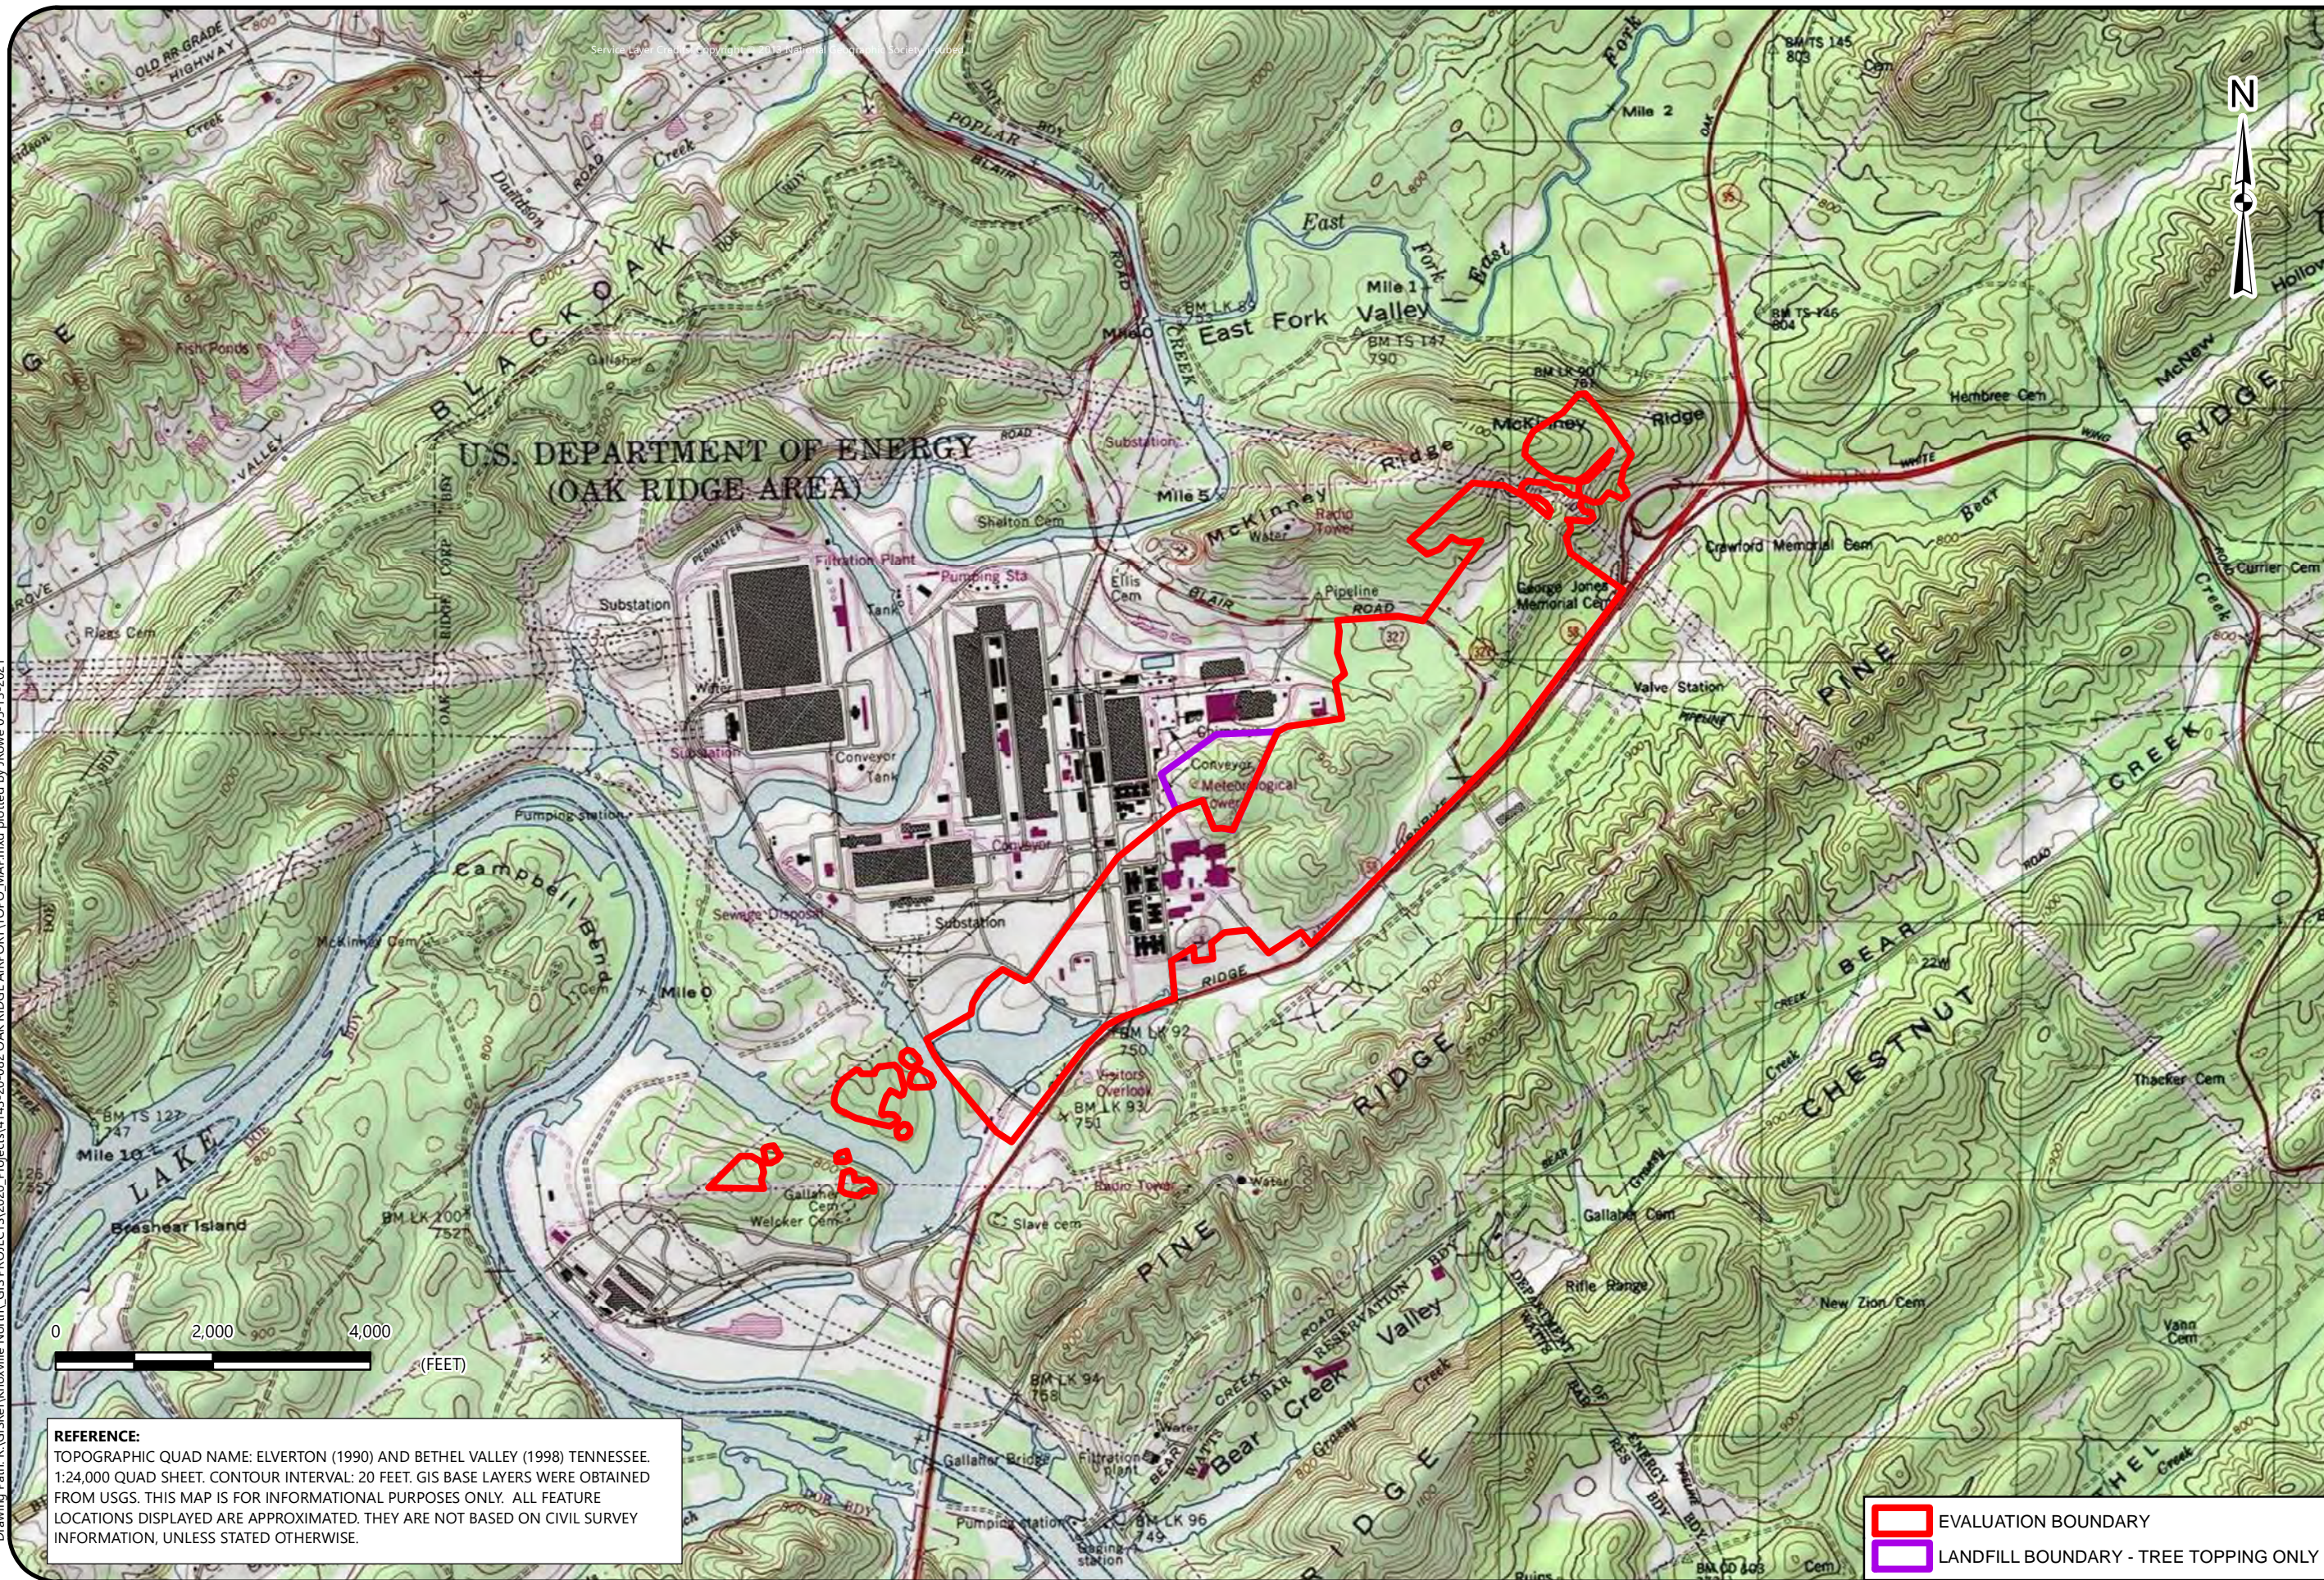

S&ME performed a pedestrian review of the project area in April 2021 and identified 17 perennial / intermittent streams, 10 WWCs/ephemeral streams, 28 wetlands, and four open-water areas. Since perennial / intermittent streams and wetlands such as those observed onsite can be considered jurisdictional by the USACE and/or TDEC, impacts to these WOTS and/or WOUS (e.g., piping, dredging, fill, or relocations) require permits from both regulatory agencies. S&ME requests an Approved Jurisdictional Determination (AJD) from the USACE and an HD from TDEC to assist with site planning activities and for inclusion in the environmental assessment (EA) documentation. S&ME appreciates your assistance with this request. If you have any questions regarding this report, please call or email Josh Rowe ((865)970-0003, [jrowe@smeinc.com](mailto:jrowe@smeinc.com)).

## **Appendix II–HD Datasheets**

**Hydrologic Determination Field Data Sheet**

Tennessee Division of Water Resources, Version 1.5 (Fillable Form)

Named Waterbody: NA		Date/Time: 4/7/21, 930
Assessors/Affiliation: JOSH ROWE S&ME 1103-TN12		Project ID : S1
Site Name/Description: Oak Ridge Airport		
Site Location: Oak Ridge , Tennessee		
HUC (12 digit): 060102070303	Latitude: 35.9258	
Previous Rainfall (7-days) : 0.0	Longitude: -84.3926	
Precipitation this Season vs. Normal : average <small>Source of recent &amp; seasonal precip. data : Antecedent Precipitation Tool</small>		
Watershed Size : 100 acres	County: Roane	
Soil Type(s) / Geology : NA / Och: Chickamauga Group	Source: Soils data not available for U.S. DOE. Geology from USGS	
Surrounding Land Use : Former U.S. DOE / Forested		
Degree of historical alteration to natural channel morphology & hydrology (select one & describe fully in Notes) : Severe		

**Primary Field Indicators Observed**

Primary Indicators	NO	YES
1. Hydrologic feature exists solely due to a process discharge	<input checked="" type="checkbox"/>	WWC
2. Defined bed and bank absent, vegetation composed of upland and FACU species	<input checked="" type="checkbox"/>	WWC
3. Watercourse dry anytime during February through April 15th, under normal precipitation / groundwater conditions	<input checked="" type="checkbox"/>	WWC
4. Daily flow and precipitation records showing feature only flows in direct response to rainfall	<input checked="" type="checkbox"/>	WWC
5. Presence of multiple populations of obligate lotic organisms with ≥ 2 month aquatic phase	<input checked="" type="checkbox"/>	Stream
6. Presence of fish (except <i>Gambusia</i> )	<input checked="" type="checkbox"/>	Stream
7. Presence of naturally occurring ground water table connection	<input checked="" type="checkbox"/>	Stream
8. Flowing water in channel and 7 days since last precip >0.1" in local watershed	<input type="checkbox"/>	Stream
9. Evidence watercourse has been used as a supply of drinking water	<input checked="" type="checkbox"/>	Stream

**NOTE: If any Primary Indicators 1-9 = "Yes", then no further investigation is necessary. However, assessors may choose to score secondary indicators as supporting evidence.**

In the absence of a primary indicator, or other definitive evidence, complete the secondary indicator table on page 2 of this sheet, and provide score below.

Guidance for the interpretation and scoring of both the primary & secondary indicators is provided in *TDEC-DWR Guidance For Making Hydrologic Determinations, Version 1.5*

**Overall Hydrologic Determination = STREAM**

**Secondary Indicator Score (if applicable) = 0.00**

**Justification / Notes :**

Stream is piped under ground. Flow after 7 days no rain.

**Primary Field Indicators Observed**

Primary Indicators	NO	YES
1. Hydrologic feature exists solely due to a process discharge	<input checked="" type="checkbox"/>	WWC
2. Defined bed and bank absent, vegetation composed of upland and FACU species	<input checked="" type="checkbox"/>	WWC
3. Watercourse dry anytime during February through April 15th, under normal precipitation / groundwater conditions	<input checked="" type="checkbox"/>	WWC
4. Daily flow and precipitation records showing feature only flows in direct response to rainfall	<input checked="" type="checkbox"/>	WWC
5. Presence of multiple populations of obligate lotic organisms with ≥ 2 month aquatic phase	<input checked="" type="checkbox"/>	Stream
6. Presence of fish (except <i>Gambusia</i> )	<input checked="" type="checkbox"/>	Stream
7. Presence of naturally occurring ground water table connection	<input checked="" type="checkbox"/>	Stream
8. Flowing water in channel and 7 days since last precip >0.1" in local watershed	<input type="checkbox"/>	Stream
9. Evidence watercourse has been used as a supply of drinking water	<input checked="" type="checkbox"/>	Stream

**NOTE: If any Primary Indicators 1-9 = "Yes", then no further investigation is necessary. However, assessors may choose to score secondary indicators as supporting evidence.**

In the absence of a primary indicator, or other definitive evidence, complete the secondary indicator table on page 2 of this sheet, and provide score below.

In the absence of a primary indicator, or other definitive evidence, complete the secondary indicator table on page 2 of this sheet, and provide score below.

Guidance for the interpretation and scoring of both the primary & secondary indicators is provided in *TDEC-DWR Guidance For Making Hydrologic Determinations, Version 1.5*

**Overall Hydrologic Determination = WET WEATHER CONVEYANCE**  
**Secondary Indicator Score (if applicable) = 0.00**

**Justification / Notes :**

Drainage dry between between February and April 15th. Connects wetland WL to S7.

**Definition of Vegetation Strata:**

**Four Vegetation Strata:**

Tree stratum – Consists of woody plants, excluding vines, 3 in. (7.6 cm) or more in diameter at breast height (DBH), regardless of height.

Sapling/shrub stratum – Consists of woody plants, excluding vines, less than 3 in. DBH and greater than 3.28 ft (1 m) tall.

Herb stratum – Consists of all herbaceous (non-woody) plants, regardless of size, and all other plants less than 3.28 ft tall.

Woody vines – Consists of all woody vines greater than 3.28 ft in height.

**Five Vegetation Strata:**

Tree - Woody plants, excluding woody vines, approximately 20 ft (6 m) or more in height and 3 in. (7.6 cm) or larger in diameter at breast height (DBH).

Sapling stratum – Consists of woody plants, excluding woody vines, approximately 20 ft (6 m) or more in height and less than 3 in. (7.6 cm) DBH.

Shrub stratum – Consists of woody plants, excluding woody vines, approximately 3 to 20 ft (1 to 6 m) in height.

Herb stratum – Consists of all herbaceous (non-woody) plants, including herbaceous vines, regardless of size, and woody species, except woody vines, less than approximately 3 ft (1 m) in height.

Woody vines – Consists of all woody vines, regardless of height.

RE: Preliminary Agency Coordination  
Proposed Oak Ridge Airport  
City of Oak Ridge, Tennessee

To Whom it May Concern:

The City of Oak Ridge, with the assistance of Goodwyn Mills Cawood, LLC (GMC), is in the process of performing an Environmental Assessment (EA) pursuant to the National Environmental Policy Act (NEPA) for a proposed general aviation airport in Oak Ridge, Tennessee. The location of the proposed Oak Ridge Airport consists of approximately 475 acres to the north of the Oak Ridge Turnpike. The approximate center coordinates of the site are latitude: 35.929263° and longitude: -84.385470°. Please refer to the Figures 1-3 to view the project study area.

In summary, the central portion of the proposed project is within the East Tennessee Technology Park. This area was previously part of the K-25 Gaseous Diffusion Plant, which is a United States Department of Energy (DOE) uranium enrichment complex that ceased operation over 35 years ago. The remainder of the project site is primarily undeveloped forest. The proposed airport design features a 5,000-foot runway that will allow the facility to accommodate a variety of general aviation aircraft. Proposed development and construction activities include land clearing, grading, and placement of earthen backfill. Infrastructure development would include the runway, taxiway and apron space, vehicle access roads, parking, terminal and hangar buildings, walkways, fuel farm, and a fire protection facility with associated equipment.

GMC is providing this letter as an early coordination effort in order to receive preliminary comments from the Natural Resource Conservation Service prior to the development of the proposed Oak Ridge Airport. We would appreciate a response as soon as possible. If you need any further information, do not hesitate to contact me by email at [wesley.caputo@gmcnetwork.com](mailto:wesley.caputo@gmcnetwork.com) or by phone at (615) 333-7200.

Subject: FWS #2021-CPA-0457 / I-0952, Oak Ridge airport project, Roane County, Tennessee.

Dear Ms. Rowe,

Thank you for coordinating with us to address the potential for environmental impacts relative to a new airport project. We have reviewed the email that you sent on May 26, 2021, with a letter dated May 10, 2021, and supporting materials regarding proposed development of an airport on approximately 475 acres of land (FWS #2021-CPA-0457 / TA-0952, S&ME Project No. 4143-20-082). The proposed project site is located northwest of the Oak Ridge Turnpike near the intersection with Blair Road at Oak Ridge, Roane County, Tennessee. The supporting materials included Table 2-1 Federal and State Protected Species List, which includes federally listed species that were specified as being of potential concern during a search of the Fish and Wildlife Service's Information for Planning and Consultation system. Our input was requested regarding your "T&E Species Evaluation report" (T&E species report).

The T&E species report concluded that the majority of the federally listed species in Table 2-1 would not be affected by this action, and that two species (the Indiana bat and northern long-eared bat) are not likely to be adversely affected. However, you indicated that the federally threatened white fringeless orchid (*Platanthera integrilabia*) may occupy proposed areas of development. You indicated in the T&E species report that suitable roosting habitat for the Indiana bat and northern long-eared bat is present on the project site. As the report indicated, potential take of the northern long-eared bat is adequately addressed through the 4(d) rule for that species. You indicated that distribution information for the Indiana bat does not indicate presence of the species at the project site and that, therefore, the project is not likely to cause adverse effects to it.

The project proponent should address potential impact to the white fringeless orchid and develop conservation measures if avoidance of impact is not feasible. Potential for impact to the federally endangered Indiana bat (*Myotis sodalis*) should also be addressed. Although we are not

aware of its presence at the project site, this species has been documented in nearby areas. Because we are not aware of presence/absence survey information for this site, it is not appropriate at this time to consider the Indiana bat to be absent. Otherwise, we are not aware of federally listed species that could reasonably be expected to occur within the area of anticipated impact.

As documented in photographs 6, 7, 8, 9, and 10, perennial and intermittent streams occur within the proposed project area. These aquatic resources and adjacent habitats may support species deemed by the state to be in need of management. We recommend that conservation measures be developed to minimize direct and indirect impacts to fish and crayfish habitat (e.g., culverting of streams and transport of sediment from the proposed construction area).

The project proponent should continue to coordinate with us in an effort to conserve federally listed species and other species of concern during the planning stage for the proposed airport development. We look forward to opportunities to pursue conservation efforts during that coordination. Feel free to contact David Pelren of my staff at 931-261-5844 or by email at david\_pelren@fws.gov if further coordination regarding this project will be helpful.

Sincerely,

RE: FAA / Federal Aviation Administration, Proposed Oak Ridge Airport, Oak Ridge, Roane County, TN

Dear Dr. Singh:

In response to your request, we have reviewed the documents submitted regarding your proposed undertaking. Our review of and comment on your proposed undertaking are among the requirements of Section 106 of the National Historic Preservation Act. This Act requires federal agencies or applicants for federal assistance to consult with the appropriate State Historic Preservation Office before they carry out their proposed undertakings. The Advisory Council on Historic Preservation has codified procedures for carrying out Section 106 review in 36 CFR 800 (Federal Register, December 12, 2000, 77698-77739) .

Considering available information, we concur that the project as currently proposed will adversely affect the National Register of Historic Places listed George Jones Memorial Baptist Church.

Further, the airport design and construction should take into consideration the ongoing cultural resource mitigation measures being implemented to address the Department of Energy's previous adverse effect to the now-demolished K-25 facility. Effort should be taken to design and construct the airport so as not to hinder or negatively impact these mitigative and interpretive plans.

You should continue to consult with our office to resolve the adverse effect. Please direct questions and comments to Kelley Reid (615) 770-1099. We appreciate your cooperation.

Sincerely,

for: E. Patrick McIntyre, Jr.

Dear Ms. Rowe:

This letter is in regard to your report entitled *Jurisdictional Waters Report Oak Ridge Airport Oak Ridge, Roane County, Tennessee S&ME Project No. 4143-20-082*, received May 26, 2021" and subsequent correspondence June 30, 2021 and July 1, 2021, which documented potential waters of the United States on a review area of approximately 475 acres. The JD Report, associated with Oak Ridge Airport, near Oak Ridge, Tennessee, indicated your preference for potential waters of the U.S. on the review area to be reviewed as an approved jurisdictional determination (AJD) /preliminary jurisdictional determination (PJD). This project has been assigned File No. LRN-2021-00493, please refer to this number in any future correspondence.

The U.S. Army Corps of Engineers (USACE) has regulatory responsibilities pursuant to Section 404 of the Clean Water Act (33 U.S.C. 1344) and Section 10 of the Rivers and Harbors Act of 1899 (33 U.S.C. 403). Under Section 10, the USACE regulates any work in, or affecting, navigable waters of the U.S. It appears the review area includes navigable waters of the U.S. and would be subject to the provisions of Section 10. Under Section 404, the USACE regulates the discharge of dredged and/or fill material into waters of the U.S., including wetlands.

**a. Preliminary Jurisdictional Determination:** Based on a field review on June 9, 2021 and on a desktop review of the JD Report, five reaches of intermittent stream totaling 2,823 linear feet, and 0.34 acres of wetlands were documented within the review area. This office has determined these features **may** be jurisdictional waters of the U.S. in accordance with 33 C.F.R. 331.2 and a PJD has been prepared. The PJD is non-binding, cannot be appealed and only provides a written indication that waters of the U.S, including wetlands, may be present on-site. For purposes of computation of

impacts, compensatory mitigation requirements and other resource protection measures, a permit decision made on the basis of a PJD will treat all waters that would be affected in any way by the permitted activity on the site as if they are jurisdictional waters of the U.S. This determination is only valid for the review area shown on the attached map entitled "LRN-2021-00493, Sheets 1-7", attached to this letter.

Enclosed with this letter is a copy of the PJD. If you agree with the findings of this PJD and understand your options regarding the same, please sign and date the form and return it to this office within 30 days of receipt of this letter. You should submit the signed copy to the following address:

U.S. Army Corps of Engineers  
East Regulatory Field Office  
501 Adesa Parkway, Suite 250  
Lenoir City, Tennessee 37771  
Attn: Mark M. McIntosh

**b. Approved Jurisdictional Determination:** Also enclosed is an approved jurisdictional determination for aquatic resources identified as Poplar Creek, S1, S2, S3, S4, S5, S6, S7, S8, S14, S15, S16, S17, OW1, OW2, OW3, OW4, WA, WB, WC, WE, WF, WG, WH, WI, WJ, WK, WN, WU, WV, WY, WZ, WAA, WBB, WCC, ES1, ES2, ES3, ES4, ES5, ES6, ES7, ES8, ES9, ES10, WL, WM, WW, WX, and OW4. The rationale for this determination is provided in the attached Approved Jurisdictional Determination form. The approved jurisdictional determination expires five years from the date of this letter, unless new information warrants revision of the determination before the expiration date, or the District Engineer identifies specific geographic areas with rapidly changing environmental conditions that merit re-verification on a more frequent basis. This approved jurisdictional determination is only valid for the review area as shown on the map labeled "LRN-2021-00493, Sheets 1-7"

If you object to this decision, you may request an administrative appeal under Corps regulations at 33 CFR Part 331. Enclosed you will find a Notification of Appeals Process (NAP) fact sheet and Request for Appeal (RFA) form. If you request to appeal this decision you must submit a completed RFA form to the Great Lakes and Ohio River Division, Division Office at the following address:

Regulatory Appeal Review Officer  
ATTN: Ms. Suzanne Chubb  
Army Engineer Division  
550 Main Street, Room 10-714  
Cincinnati, OH 45202-3222  
TEL (513) 684-7261

In order for an RFA to be accepted by the USACE, the USACE must determine that it is complete, that it meets the criteria for appeal under 33 CFR Part 331.5, and that it has been received by the Division Office within 60 days of the date listed on the RFA form. **It is not necessary to submit an RFA form to the Division Office if you do not object to the decision in this letter.**

The delineation included herein has been conducted to identify the location and extent of the aquatic resource boundaries and/or the jurisdictional status of aquatic resources for purposes of the Clean Water Act for the particular site identified in this request. This delineation and/or jurisdictional determination may not be valid for the Wetland Conservation Provisions of the Food Security Act of 1985, as amended. If you or your tenant are USDA program participants, or anticipate participation in USDA programs, you should discuss the applicability of a certified wetland determination with the local USDA service center, prior to starting work.

We appreciate your awareness of the USACE regulatory program. If you have any questions, you may contact the Project Manager at (865) 986-7296, or by e-mail at [mark.m.mcintosh@usace.army.mil](mailto:mark.m.mcintosh@usace.army.mil).

1. The Corps of Engineers believes that there may be jurisdictional aquatic resources in the review area, and the requestor of this PJD is hereby advised of his or her option to request and obtain an approved JD (AJD) for that review area based on an informed decision after having discussed the various types of JDs and their characteristics and circumstances when they may be appropriate.

2. In any circumstance where a permit applicant obtains an individual permit, or a Nationwide General Permit (NWP) or other general permit verification requiring "pre-construction notification" (PCN), or requests verification for a non-reporting NWP or other general permit, and the permit applicant has not requested an AJD for the activity, the permit applicant is hereby made aware that: (1) the permit applicant has elected to seek a permit authorization based on a PJD, which does not make an official determination of jurisdictional aquatic resources; (2) the applicant has the option to request an AJD before accepting the terms and conditions of the permit authorization, and that basing a permit authorization on an AJD could possibly result in less compensatory mitigation being required or different special conditions; (3) the applicant has the right to request an individual permit rather than accepting the terms and conditions of the NWP or other general permit authorization; (4) the applicant can accept a permit authorization and thereby agree to comply with all the terms and conditions of that permit, including whatever mitigation requirements the Corps has determined to be necessary; (5) undertaking any activity in reliance upon the subject permit authorization without requesting an AJD constitutes the applicant's acceptance of the use of the PJD; (6) accepting a permit authorization (e.g., signing a proffered individual permit) or undertaking any activity in reliance on any form of Corps permit authorization based on a PJD constitutes agreement that all aquatic resources in the review area affected in any way by that activity will be treated as jurisdictional, and waives any challenge to such jurisdiction in any administrative or judicial compliance or enforcement action, or in any administrative appeal or in any Federal court; and (7) whether the applicant elects to use either an AJD or a PJD, the JD will be processed as soon as practicable. Further, an AJD, a proffered individual permit (and all terms and conditions contained therein), or individual permit denial can be administratively appealed pursuant to 33 C.F.R. Part 331. If, during an administrative appeal, it becomes appropriate to make an official determination whether geographic jurisdiction exists over aquatic resources in the review area, or to provide an official delineation of jurisdictional aquatic resources in the review area, the Corps will provide an AJD to accomplish that result, as soon as is practicable. This PJD finds that there "may be" waters of the U.S. and/or that there "may be" navigable waters of the U.S. on the subject review area, and identifies all aquatic features in the review area that could be affected by the proposed activity, based on the following information:

- The review area is comprised entirely of dry land (i.e., there are no waters or water features, including wetlands, of any kind in the entire review area). Rationale: N/A or describe rationale.
- There are "navigable waters of the United States" within Rivers and Harbors Act jurisdiction within the review area (complete table in Section II.B).
- There are "waters of the United States" within Clean Water Act jurisdiction within the review area (complete appropriate tables in Section II.C).
- There are waters or water features excluded from Clean Water Act jurisdiction within the review area (complete table in Section II.D).

Lakes and ponds, and impoundments of jurisdictional waters ((a)(3) waters):				
(a)(3) Name	(a)(3) Size		(a)(3) Criteria	Rationale for (a)(3) Determination
OW1	11.5	acre(s)	(a)(3) Lake/pond or impoundment of a jurisdictional water contributes surface water flow directly or indirectly to an (a)(1) water in a typical year.	OW1 contributes surface water flow through a flood control structure to Poplar Creek. Therefore, OW1 meets the criteria of an (a)(3) lake, pond, or impoundment. As such, OW1 qualifies as a jurisdictional water under the Navigable Waters Protection Rule.
OW2	0.15	acre(s)	(a)(3) Lake/pond or impoundment of a jurisdictional water contributes surface water flow directly or indirectly to an (a)(1) water in a typical year.	OW2 contributes surface water flow through a flood control structure to Poplar Creek. Therefore, OW2 meets the criteria of an (a)(3) lake, pond, or impoundment. Excluded waters ((b)(1) – (b)(12)): <sup>4</sup>				
Exclusion Name	Exclusion Size		Exclusion <sup>5</sup>	Rationale for Exclusion Determination
ES1	47	linear feet	(b)(3) Ephemeral feature, including an ephemeral stream, swale, gully, rill, or pool.	ES1 was determined to have an ephemeral flow regime based on an evaluation of the submitted information, a site inspection, topographical maps, and online resources including the NHD layer and Stream Stats application. No aquatic plants or macroinvertebrates were observed
ES2	100	linear feet	(b)(3) Ephemeral feature, including an ephemeral stream, swale, gully, rill, or pool.	ES2 was determined to have an ephemeral flow regime based on an evaluation of the submitted information, a site inspection, topographical maps, and online resources including the NHD layer and Stream Stats application. No aquatic plants or macroinvertebrates were observed
ES3	120	linear feet	(b)(3) Ephemeral feature, including an ephemeral stream, swale, gully, rill, or pool.	ES3 was determined to have an ephemeral flow regime based on an evaluation of the submitted information, a site inspection, topographical maps, and online resources including the NHD layer and Stream Stats application. No aquatic plants or macroinvertebrates were observed
ES4	82	linear feet	(b)(3) Ephemeral feature, including an ephemeral stream, swale, gully, rill, or pool.	ES4 was determined to have an ephemeral flow regime based on an evaluation of the submitted information, a site inspection, topographical maps, and online resources including the NHD layer and Stream Stats application. No aquatic plants or macroinvertebrates were observed
ES5	93	linear feet	(b)(3) Ephemeral feature, including an ephemeral stream, swale, gully, rill, or pool.	ES5 was determined to have an ephemeral flow regime based on an evaluation of the submitted information, a site inspection, topographical maps, and online resources including the NHD layer and Stream Stats application. No aquatic plants or macroinvertebrates were observed
ES6	320	linear feet	(b)(3) Ephemeral feature, including an ephemeral stream, swale, gully, rill, or pool.	ES6 was determined to have an ephemeral flow regime based on an evaluation of the submitted information, a site inspection, topographical maps, and online resources including the NHD layer and Stream Stats application. No aquatic plants or macroinvertebrates were observed

<sup>4</sup> Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

<sup>5</sup> Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.

No aquatic plants or macroinvertebrates were observed
ES9	359	linear feet	(b)(3) Ephemeral feature, including an ephemeral stream, swale, gully, rill, or pool.	ES-9 was determined to have an ephemeral flow regime based on an evaluation of the submitted information, a site inspection, topographical maps, and online resources including the NHD layer and Stream Stats application. No aquatic plants or macroinvertebrates were observed
ES10	68	linear feet	(b)(3) Ephemeral feature, including an ephemeral stream, swale, gully, rill, or pool.	ES-10 was determined to have an ephemeral flow regime based on an evaluation of the submitted information, a site inspection, topographical maps, and online resources including the NHD layer and Stream Stats application. WL	0.06	acre(s)	(b)(1) Non-adjacent wetland.	WL is excluded as a non-adjacent wetland and is not jurisdictional under the Navigable Waters Protection Rule of the Clean Water Act due to the following: WL abuts ES-3 which is a (b)(3) excluded water with an ephemeral flow regime. Therefore, this feature does not abut an (a)(1)-(3) jurisdictional water; is not inundated by flooding from an (a)(1)-(3) water in a typical year; is not physically separated from an (a)(1)-(3) water solely by a natural berm, bank, dune, or similar natural feature; nor by an artificial dike, barrier, or similar artificial structure. This feature does not have perennial or intermittent concentrated flow and does not meet the definition of an (a)(1)-(3) water.

**B. Typical year assessment(s):** The Antecedent Precipitation Tool was used to evaluate the project area for the previous 90 days, with an input date of 06/10/2021. A single point centered on the center of the project site was used to evaluate the rainfall data and was determined to be sufficient based on the small geographic size of the site. The 90 day period prior to 06/10/2021 was determined to be normal. No evidence of recent or sustained flow was observed in the ephemeral streams during the site visits. 0.5-0.75" of rainfall was recorded 72 hours prior to the site visit.

## NOTIFICATION OF ADMINISTRATIVE APPEAL OPTIONS AND PROCESS AND REQUEST FOR APPEAL

Applicant: Sarah Rowe	File Number: LRN-2021-00493	Date: 27-Aug-21
Attached is:		See Section below
<input type="checkbox"/>	INITIAL PROFFERED PERMIT (Standard Permit or Letter of permission)	A
<input type="checkbox"/>	PROFFERED PERMIT (Standard Permit or Letter of permission)	B
<input type="checkbox"/>	PERMIT DENIAL	C
X	APPROVED JURISDICTIONAL DETERMINATION	D
X	PRELIMINARY JURISDICTIONAL DETERMINATION	E

**SECTION I - The following identifies your rights and options regarding an administrative appeal of the above decision. Additional information may be found at**

[http://www.usace.army.mil/CECW/Pages/reg\\_materials.aspx](http://www.usace.army.mil/CECW/Pages/reg_materials.aspx) or Corps regulations at 33 CFR Part 331.

**A: INITIAL PROFFERED PERMIT:** You may accept or object to the permit.

- **ACCEPT:** If you received a Standard Permit, you may sign the permit document and return it to the district engineer for final authorization. If you received a Letter of Permission (LOP), you may accept the LOP and your work is authorized. Your signature on the Standard Permit or acceptance of the LOP means that you accept the permit in its entirety, and waive all rights to appeal the permit, including its terms and conditions, and approved jurisdictional determinations associated with the permit.
- **OBJECT:** If you object to the permit (Standard or LOP) because of certain terms and conditions therein, you may request that the permit be modified accordingly. You must complete Section II of this form and return the form to the district engineer. Your objections must be received by the district engineer within 60 days of the date of this notice, or you will forfeit your right to appeal the permit in the future. Upon receipt of your letter, the district engineer will evaluate your objections and may: (a) modify the permit to address all of your concerns, (b) modify the permit to address some of your objections, or (c) not modify the permit having determined that the permit should be issued as previously written. After evaluating your objections, the district engineer will send you a proffered permit for your reconsideration, as indicated in Section B below.

**B: PROFFERED PERMIT:** You may accept or appeal the permit

- **ACCEPT:** If you received a Standard Permit, you may sign the permit document and return it to the district engineer for final authorization. If you received a Letter of Permission (LOP), you may accept the LOP and your work is authorized. Your signature on the Standard Permit or acceptance of the LOP means that you accept the permit in its entirety, and waive all rights to appeal the permit, including its terms and conditions, and approved jurisdictional determinations associated with the permit.
- **APPEAL:** If you choose to decline the proffered permit (Standard or LOP) because of certain terms and conditions therein, you may appeal the declined permit under the Corps of Engineers Administrative Appeal Process by completing Section II of this form and sending the form to the division engineer. This form must be received by the division engineer within 60 days of the date of this notice.

**C: PERMIT DENIAL:** You may appeal the denial of a permit under the Corps of Engineers Administrative Appeal Process by completing Section II of this form and sending the form to the division engineer. This form must be received by the division engineer within 60 days of the date of this notice.

**D: APPROVED JURISDICTIONAL DETERMINATION:** You may accept or appeal the approved JD or provide new information.

- **ACCEPT:** You do not need to notify the Corps to accept an approved JD. Failure to notify the Corps within 60 days of the date of this notice, means that you accept the approved JD in its entirety, and waive all rights to appeal the approved JD.
- **APPEAL:** If you disagree with the approved JD, you may appeal the approved JD under the Corps of Engineers Administrative Appeal Process by completing Section II of this form and sending the form to the division engineer. This form must be received by the division engineer within 60 days of the date of this notice.

**E: PRELIMINARY JURISDICTIONAL DETERMINATION:** You do not need to respond to the Corps regarding the preliminary JD. The Preliminary JD is not appealable. If you wish, you may request an approved JD (which may be appealed), by contacting the Corps district for further instruction. Also you may provide new information for further consideration by the Corps to reevaluate the JD.

**SECTION II - REQUEST FOR APPEAL or OBJECTIONS TO AN INITIAL PROFFERED PERMIT**

**REASONS FOR APPEAL OR OBJECTIONS:** (Describe your reasons for appealing the decision or your objections to an initial proffered permit in clear concise statements. You may attach additional information to this form to clarify where your reasons or objections are addressed in the administrative record.)

**ADDITIONAL INFORMATION:** The appeal is limited to a review of the administrative record, the Corps memorandum for the record of the appeal conference or meeting, and any supplemental information that the review officer has determined is needed to clarify the administrative record. Neither the appellant nor the Corps may add new information or analyses to the record. However, you may provide additional information to clarify the location of information that is already in the administrative record.

**POINT OF CONTACT FOR QUESTIONS OR INFORMATION:**

If you have questions regarding this decision and/or the appeal process you may contact:

Re: EPA Comments on the Notice of Intent to Prepare an Environmental Assessment for the Construction and Operation of an Airport at Oak Ridge, Tennessee

Dear Mr. Caputo:

The U. S. Environmental Protection Agency (EPA) received the referenced document and has reviewed the subject proposal in accordance with Section 309 of the Clean Air Act and Section 102(2)(C) of the National Environmental Policy Act (NEPA). The EPA understands that the City of Oak Ridge (Oak Ridge) is conducting an Environmental Assessment (EA) for the proposed construction and operation of a general aviation airport.

Under the Proposed Action Alternative, Oak Ridge would construct and operate a 5,000 ft runway on the site of the former United States Department of Energy K-25 Gaseous Diffusion Plant and adjacent lands. Supporting infrastructure to be constructed would include access roads, taxiways, aprons, hangars, a terminal, a fire-fighting facility, graded surfaces, a fueling facility, and ancillary stormwater drainage structures. The purpose of this EA is for Oak Ridge to evaluate the impacts of this Proposed Action.

Upon review of the scoping documents, the EPA notes that the improvements considered are compatible with the current land use of this facility. It appears that this project will not have a significant impact on human health and the environment. The EPA has the following comments:

**Air Quality and Climate Change:** The Proposed Action is located in Roane County, Tennessee which is currently in Maintenance Status with the National Ambient Air Quality Standards for Particulate Matter (PM 2.5). The EPA recommends analyzing the Proposed Action using tools such as the Air Conformity Applicability Model to verify that construction and operation in support of the Proposed Action will not produce emissions above de minimis levels. The EPA recommends controlling fugitive dust emissions and implementing measures to reduce diesel emissions from construction equipment, such as switching to cleaner fuels, retrofitting equipment with emission reduction technologies, repowering older engines with cleaner engines, replacing older vehicles, inspecting and maintaining fuel tanks in accordance with regulations, and reducing idling through operator training and contracting policies. Quantification of contributions to climate change attributable to the Proposed Action may further the purposes of the EA.

**Hazardous Materials and Containment:** The Oak Ridge Reservation Superfund site extends onto property selected for the Proposed Action. Coordination with the EPA's Superfund division should be made to ensure that contaminated soils are not transported to uncontaminated areas and that future remediation efforts are not negatively affected by the Proposed Action. Construction and operation in support of the Proposed Action should ensure that Resource Conservation and Recovery Act-regulated solid wastes generated are disposed of in accordance with federal regulations. The EPA recommends the use of secondary containment for storage and handling of Petroleum, Oils, and Lubricants (POL) to protect surface waters of Roane County and as required

by the Clean Water Act. Where secondary containment is not directly practicable, spill ponds and oil water separators should be constructed downstream of POL related activities.

**Wetlands and Streams:** The Proposed Action would be sited on industrially developed and forested lands with a wetland and creeks associated with the Clinch River. The EPA recommends that design proposals and construction avoid impacting Waters of the United States (WOTUS) to the maximum extent practicable by locating permanent infrastructure and temporary construction measures away from WOTUS and respective buffers. WOTUS should be delineated and coordination with the US Army Corps of Engineers should be made where proposed activities might enter or affect WOTUS. Mitigation may be required where impacts to WOTUS cannot be avoided. Flood zone and flood inundation maps should be used to help ensure proposed activities do not take place in floodplains except where alternatives are not practicable.

**Water Quality:** The Proposed Action would disturb a considerable amount of soil. A construction stormwater permit will be required before construction can begin. Airport operation will require an industrial permit under the National Pollution Discharge Elimination System. Best management practices should be implemented to mitigate impacts. Construction of rainwater runoff control structures designed to leave existing stormwater runoff profiles of the area unchanged may be required to mitigate the impacts of land development and construction of impervious surfaces, in accordance with Section 438 of the Energy Independence and Security Act of 2007.

**Biological Resources:** The EPA principally defers to the US Fish and Wildlife Service (FWS) regarding compliance with the Endangered Species Act and recommends early coordination with the FWS. The EPA recommends that conservation measures identified by the FWS be included in the Final EA and FONSI. The EPA understands that the runway, airport infrastructure, and Runway Safe Area (RSA) requirements associated with the Proposed Action may necessitate the permanent removal of forest. Forest planting and stream protection and renewal should take place in areas of temporary disturbance. The EPA defers to the Federal Aviation Administration regarding RSA requirements and recommends the maximum conservation of natural resources, where allowed by law and safety requirements.

**Environmental Justice:** Consistent with Executive Order 12898, Federal Actions to Address Environmental Justice (EJ) in Minority Populations and Low-Income Populations (<https://www.epa.gov/laws-regulations/summary-executive-order-12898-federal-actions-address-environmental-justice>), please ensure protected populations are not disproportionately or adversely impacted by the project. We also promote compliance with Executive Order 13166, Improving Access to Services for Persons with Limited English Proficiency, if applicable. Please include the EJSCREEN tool (<https://www.epa.gov/ejscreen>) as part of the NEPA analysis process. EJSCREEN combines environmental and demographic data to help determine EJ concerns that are integral to the NEPA process.

**Noise Impacts:** The EA should identify aviation traffic patterns due to the Proposed Action and evaluate resulting noise impacts to the local community.

**Energy Efficiency and Recycling:** Efforts should be made to divert any recyclable materials such as concrete, steel, and asphalt away from landfills and repurpose materials instead. The EPA recommends the use of sustainable building practices that maximize energy and water conservation, and the use of renewable energy including solar power for supplemental electricity and lighting for the taxiway, parking lots, or buildings that may be constructed. Please consult appropriate federal agencies (<https://www.energy.gov/eere/femp/sustainable-federal-buildings>) for energy conservation requirements.

Thank you for the opportunity to provide comments on the City of Oak Ridge's proposed general aviation airport. For effective coordination, please provide this office with an electronic version of the draft EA for

further review and keep the local community informed and involved throughout the project process. If you have any questions, feel free to contact me at the information provided in my email.

Sarah,

I apologize for just now responding to this project. There are several State listed *In Need of Management (D)* species within a close proximity to the proposed project site, the Southeastern Shrew - *Sorex longirostris*, Southern Bog Lemming - *Synaptomys cooperi*, Cinereus Shrew - *Sorex cinereus*, and Sharp-shinned Hawk - *Accipiter striatus*. Based on the information provided and a review of our databases, I feel there will be no negative impacts to these species or critical habitat, under our authority.

If you have any questions or comments concerning this, feel to contact me.

Thanks

Hi, Bobby – Our client has a meeting scheduled with the FAA and numerous consulting parties on Friday (August 27), and I believe your name was on the list as a potential attendee. Is there any chance you could provide me with your review of the proposed project and any potential impacts to state-listed animals prior to the meeting? I've received responses from USFWS and TDEC DNA but still need one from TWRA to include in the EA review.

Call me if you have any questions about the project.  
Thank you!

Hi, Bobby – I'm just checking on the status of the TWRA review for the proposed Oak Ridge Airport project. I just received the attached letter from the Division of Natural Areas that lists you as the TWRA contact (instead of Della Sawyers, who I originally sent the report to). Please let me know if you have any questions or need additional information to provide comments on the project.

Thanks!

Hi, Della, Dillon, and Robbie —I hope you're all doing well. Attached is a project review request for a proposed airport project in Oak Ridge, Roane County, TN. Dillon, I uploaded the report to the online portal, so you should have already received it. An Environmental Assessment (EA), FAA review, and 404 permitting will be required; therefore, we request your comments about potential impacts to

species resulting from the proposed project. Please let me know if you have any questions.

Thanks!

Roane County, TN  
Rare Species Database Review

Dear Ms. Rowe:

Thank you for your correspondence of 26 May 2021 requesting a rare species database review for the proposed 475-acre airport in Oak Ridge, Roane County, Tennessee.

Per your submittal:

*The City of Oak Ridge (the City) proposes to construct a new airport on approximately 475 acres of land northwest of the Oak Ridge Turnpike near the intersection with Blair Road in Oak Ridge, Roane County, Tennessee... Portions of the site were previously used for Department of Energy (DOE) operations for the K-25 uranium enrichment facility site, which the DOE has been working for more than 10 years to reclaim for industrial use. The proposed project is located in the area now known as the Heritage Center Industrial Park. The proposed airport will assist in the revitalization of the industrial park and the City anticipates that it will prove to be an economic generator bringing jobs and visitors from around the country to the region...*

*S&ME personnel visited the site in late March/early April 2021 to locate and delineate jurisdictional waters and potential T&E species concerns within the project area. The primary site-development area is bordered by Burchfield Road and the Poplar Creek Embayment to the southwest, Oak Ridge Turnpike to the south/southeast, forest to the north/northeast/northwest, and the K-25 Site footprint to the west. The surrounding area is primarily forest on all sides except for the north, which consists of the K-25 Site that is currently in the demolition, cleanup, and redevelopment stages. Eight small polygonal areas are also located to the southwest and northeast of the primary airport site. These areas will require tree clearing within the proposed runway protection zone; these areas are surrounded by mature forest.*

*Due to historical use of the site, the southwest third of the site is comprised of buildings, pavement, roads, utilities, stormwater ponds, and lawn. The remainder of the site consists of mature and successional forest transected by roads, cleared powerline easements, and church/cemetery grounds.*

Typical trees within the forest include various red and white oaks (*Quercus sp.*), maples (*Acer sp.*), hackberry (*Celtis occidentalis*), loblolly pine (*Pinus taeda*), hickory (*Carya sp.*), American beech (*Fagus grandifolia*), sweetgum (*Liquidambar styraciflua*), eastern red cedar (*Juniperus virginiana*), black cherry (*Prunus serotina*), redbud (*Cercis canadensis*), dogwood (*Cornus florida*), and elms (*Ulmus sp.*). Trees along the ponds and wetlands include sycamore (*Platanus occidentalis*), black willow (*Salix nigra*), and bald cypress (*Taxodium distichum*). Understory shrubs include tree saplings of the previously-mentioned species, privet (*Ligustrum sinense*), honeysuckle (*Lonicera maackii*), fire cherry (*Prunus pensylvanica*), spicebush (*Lindera benzoin*), coralberry (*Symphoricarpos orbiculatus*), and silky dogwood (*Cornus amomum*).

Multiple habitat types are located within the project area, including mature and successional deciduous and pine forest, grassland, riparian areas, wetlands, and ponds. Poplar Creek borders the site to the west but will not be impacted by the proposed project. The streams that may be impacted by the project consist of small drainages that are mostly intermittent, with a few low-flowing perennial streams also present.

We have reviewed the state's natural heritage database with regard to the project boundaries, and we find that the following rare species have been observed previously within one mile of the project area:

Type	Scientific Name	Common Name	Global Rank	St. Rank	Fed. Prot.	St. Prot.	Habitat

Vertebrate Animal	<i>Hemidactylum scutatum</i>	Four-toed Salamander	G5	S3	--	D	Woodland swamps, shallow depressions, & sphagnum mats on acidic soils; middle & east Tennessee.
Vertebrate Animal	<i>Limnothlypis swainsonii</i>	Swainson's Warbler	G4	S3	--	D	Mature, rich, damp, deciduous floodplain and swamp forests.
Vertebrate Animal	<i>Ophisaurus attenuatus longicaudus</i>	Eastern Slender Glass Lizard	G5T5	S3	--	D	Dry upland areas including brushy, cut-over woodlands and grassy fields; nearly statewide but obscure; fossorial.
Vertebrate Animal	<i>Peucaea aestivalis</i>	Bachman's Sparrow	G3	S1B	--	E	Dry open pine or oak woods; nests on the ground in dense cover.
Vertebrate Animal	<i>Pituophis melanoleucus melanoleucus</i>	Northern Pinesnake	G4T4	S3	--	T	Well-drained sandy soils in pine/pine-oak woods; dry mountain ridges; E portions of west TN, E to lower elev of the Appalachians.
Vertebrate Animal	<i>Sorex dispar</i>	Long-tailed Shrew	G4	S2	--	D	Mountainous, forested areas with loose talus; east Tennessee.

The Division of Natural Areas - Natural Heritage Program has reviewed the location of the proposed project workspace with respect to rare plant species. Given the land area to be impacted by the project, the diversity of habitat types in the project area, and the proximity of documented occurrences of rare species, the project could impact rare, threatened, or endangered species. That said, with the exception of an observation of *Myotis grisescens* from Perimeter Road, none of the species reported in the 1- and 4- mile tables above have

been previously reported within the proposed project area. If biological surveys are conducted, we recommend looking for species found in the 1- and 4- mile tables we have provided where appropriate habitat is present.

Along with the rare species information Division of Natural Areas has provided, please note the northern extent of the proposed project area submitted to our office includes a portion of a conservation easement where the Tennessee Wildlife Resources Agency (TWRA) is the grantee from the U.S. Department of Energy. The easement is referred to as the Black Oak Ridge Conservation Easement or BORCE. As such, planners of the proposed project should consult with Tracey Boyers, legal counsel for TWRA ([Tracey.E.Boyers@tn.gov](mailto:Tracey.E.Boyers@tn.gov)).

We also ask that you coordinate this project with the Tennessee Wildlife Resources Agency (Region 3, Bobby Brown, 931-484-9571, [bobby.brown@tn.gov](mailto:bobby.brown@tn.gov)) to ensure that legal requirements for protection of state listed rare animals are addressed. Additionally, we ask that you contact the U.S. Fish and Wildlife Service Field Office, Cookeville, Tennessee (931-525-4970) for comments regarding federally listed species. Please ensure that best management practices to address erosion and sediment are implemented and maintained during construction activities. Note that the [General Aquatic Resource Alteration Permit](#) states that “use of monofilament-type erosion control netting or blanket is prohibited in the stream channel, stream banks, or any disturbed riparian areas within 30 feet of top of bank.” Where necessary and feasible, we encourage use of biodegradable netting under the CGP (Construction General Stormwater Permit) as well.

Thank you for considering Tennessee’s rare species throughout the planning of this project. Should you have any questions, please do not hesitate to contact me at 615-532-4799 or [dillon.blankenship@tn.gov](mailto:dillon.blankenship@tn.gov).

Sincerely,

*Dillon*
